*Late-Life Homelessness* - Amanda Grenier 2022-01-15

Around the world and across a range of contexts, homelessness among older people is on the rise. In spite of growing media attention and new academic research on the issue, older people often remain unrecognized as a subpopulation in public policy, programs, and homeless strategies. As such, they occupy a paradoxical position of being hypervisible while remaining overlooked. *Late-Life Homelessness* is the first Canadian book to address this often neglected issue. Basing her analysis on a four-year ethnographic study of late-life homelessness in Montreal, Canada, Amanda Grenier uses a critical gerontological perspective to explore life at the intersection of aging and homelessness. She draws attention to disadvantage over time and how the condition of being unhoused disrupts a person's ability to age in place, resulting in experiences of unequal aging. Weaving together findings from policy documents, stakeholder insights, and observations and interviews with older people, this book demonstrates how structures, organizational practices, and relationships related to homelessness and aging come to shape late life. Situated in the context of an aging population, rising inequality, and declining social commitments, *Late-Life Homelessness* stresses the moral imperative of responding justly to the needs of older people as a means of mitigating the unequal aging of unhoused elders.

**The Political Economy of Pensions** - Richard Lee Deaton 1989

In 2011, the 'Baby Boom' generation will begin to retire. By then, the stark reality of the 'greying' of the population in North America and Western Europe will have brought the inadequacies of the state and private pension systems home to all levels of society, and the pension crisis will be actual rather than impending. In *The Political Economy of Pensions*, Richard Deaton explores the factors involved in this high-profile issue of public policy and shows the insufficiency of recent reform initiatives in Canada, the United States, and Britain. Four converging considerations explain the imminence of the pension crisis.

*The Pension Crisis* - Robert J. Lynn 1983

*Passing Wealth on Death* - Alexandra Braun 2016-07-28

Wealth can be transferred on death in a number of different ways, most commonly by will. Yet a person can also use a variety of other means to benefit someone on death. Examples include donations mortis causa, joint tenancies, trusts, life-insurance contracts and nominations in pension and retirement plans. In the US, these modes of transfer are grouped under the category of 'will-substitutes' and are generally treated as testamentary dispositions. Much has been written about the effect of the use of will-substitutes in the US, but little is generally known about developments in other jurisdictions. For the first time, this collection of contributions looks at will-substitutes from a comparative perspective. It examines mechanisms that pass wealth on death across a number of common law, civil law and mixed legal jurisdictions, and explores the rationale behind their use. It analyses them from different viewpoints, including those of owners of businesses, investors, as well as creditors, family members and dependants. The aims of the volume are to show the complexity and dynamics of wealth transfers on death across jurisdictions, to identify patterns between jurisdictions, and to report the attitudes towards the different modes of transfer in light of their utility and the potential frictions they give rise to with policies and principles underpinning current laws.

**The Four Lenses of Population Aging** - Patrik Marier 2021-05-02

With its implications for health care, the economy, and an assortment of other policy areas, population aging is one of the most pressing issues facing governments and society today, and confronting its complex reality is becoming increasingly urgent, particularly in the age of COVID-19. In *The Four Lenses of Population Aging*, Patrik Marier looks at how Canada's ten provinces are preparing for an aging society. Focusing on a wide range of administrative and policy challenges, this analysis explores multiple actions from the development of strategic plans to the expansion of long-term care capacity. To enhance this analysis, Marier adopts four lenses: the intergenerational, the medical, the social gerontological, and the organizational. By comparing the unique insights and contributions of each lens, Marier draws attention to the vital lessons and possible solutions to the challenges of an aging society. Drawing on over a hundred interviews with senior civil servants and thousands of policy documents, *The Four Lenses of Population Aging* is a significant contribution to public administration, provincial politics, and comparative public policy literatures, and a timely resource for policymakers and general readers seeking an informed perspective on a timely and important issue.

*How Ottawa Spends, 2013-2014* - Christopher Stoney 2013-09-01

The 2013-14 edition of *How Ottawa Spends* critically examines national politics, priorities, and policies with a close lens on Stephen Harper's Conservative party during the middle of their first term as a majority. Contributors from across Canada examine the federal government and its not uncommon mid-term problems but also its considerable agenda of long term plans, both set in the midst of national economic fragility and a global fiscal and debt crisis. Individual chapters examine several related political, policy, and spending realms including the Budget Action Plan, the ten year Canada Health Transfer Plan, the Canada Pension Plan, and Old Age Security reforms. The contributors also consider austerity related public sector downsizing and strategic spending reviews, national energy, and related environmental strategies, and the growing Harper practice of "one-off" federalism.

Insights in the Economics of Aging - David A. Wise 2017-03-20

The fraction of the population over age sixty-five in many developed countries is projected to rise, in some cases sharply, in coming decades. This has drawn growing interest to research on the health and economic circumstances of individuals as they age. Many individuals are retiring from paid work, yet they are living longer than ever. Their well-being is shaped by their past decisions such as their saving behavior, as well as by current and future economic conditions, health status, medical innovations, and a rapidly evolving landscape of policy incentives and supports. The contributions to Insights in the Economics of Aging uncover how financial, physical, and emotional well-being are integrally related. The authors consider the interactions between financial circumstances in later life, such as household savings and home ownership, physical circumstances such as health and disability, and emotional well-being, including happiness and mental health.

**The Science and Politics of Work Disability Prevention** - Ellen MacEachen 2018-09-10

The rising cost of illness and disability benefits are one of today's biggest social and labour market challenges. The promise of activation-oriented work disability policies was labour market engagement for all people, regardless of illness, injury or impairment. However, the reality has been more complex. The Science and Politics of Work Disability Policy addresses social and political economic contexts driving state work disability reform in 13 countries. In this first attempt to explain the history and

future of work disability policy, this book asks new questions about work disability policy design, focus, and effects. It details how work disability policies have evolved with jurisdictions, why these take their current shape, and where they are heading. The well positioned authors draw on their insider knowledge and expertise in law, medicine, and social science to provide detailed case studies of their jurisdictions. This pathbreaking volume will be of interest to social security system policy makers, scholars, and students in the health and social sciences.

*Informing Social Security's Process for Financial Capability Determination* - National Academies of Sciences, Engineering, and Medicine 2016-06-20

The U.S. Social Security Administration (SSA) provides benefits to disabled adults and children, offering vital financial support to more than 19 million disabled Americans. Of that group, approximately 5.5 million have been deemed "incapable" by virtue of youth or mental or physical impairment - incapable of managing or directing the management of their benefits. Hence, a representative payee has been appointed to receive and disburse SSA payments for these beneficiaries to ensure that their basic needs for shelter, food, and clothing are met. Periodically, however, concerns have been expressed about the accuracy of the process by which SSA determines whether beneficiaries are capable of managing their benefits, with some evidence suggesting that underdetection of incapable recipients may be a particular problem. The importance of creating as accurate a process as possible for incapability determinations is underscored by the consequences of incorrectly identifying recipients either as incapable when they can manage their benefits or as capable when they cannot. Failure to identify beneficiaries who are incapable of managing their funds means abandoning a vulnerable population to potential homelessness, hunger, and disease. *Informing Social Security's Process for Financial Capability Determination* considers capability determination processes used by other similar benefit programs, abilities required to manage, and direct the management of, benefits, and effective methods and measures for assessing capability. This report evaluates SSA's capability determination process for adult beneficiaries and provides recommendations for improving the accuracy and efficiency of the agency's policy and procedures for making these determinations.

*The Promise of Assistive Technology to Enhance Activity and Work Participation* - National Academies of Sciences, Engineering, and Medicine 2017-09-01

The U.S. Census Bureau has reported that 56.7 million Americans had some type of disability in 2010, which represents 18.7 percent of the civilian noninstitutionalized population included in the 2010 Survey of Income and Program Participation. The U.S. Social Security Administration (SSA) provides

disability benefits through the Social Security Disability Insurance (SSDI) program and the Supplemental Security Income (SSI) program. As of December 2015, approximately 11 million individuals were SSDI beneficiaries, and about 8 million were SSI beneficiaries. SSA currently considers assistive devices in the nonmedical and medical areas of its program guidelines. During determinations of substantial gainful activity and income eligibility for SSI benefits, the reasonable cost of items, devices, or services applicants need to enable them to work with their impairment is subtracted from eligible earnings, even if those items or services are used for activities of daily living in addition to work. In addition, SSA considers assistive devices in its medical disability determination process and assessment of work capacity. The Promise of Assistive Technology to Enhance Activity and Work Participation provides an analysis of selected assistive products and technologies, including wheeled and seated mobility devices, upper-extremity prostheses, and products and technologies selected by the committee that pertain to hearing and to communication and speech in adults.

**Social Security Programs and Retirement around the World** - Axel Börsch-Supan 2021-03-05

This ninth phase of the International Social Security project, which studies the experiences of twelve developed countries, examines the effects of public pension reform on employment at older ages. In the past two decades, men's labor force participation at older ages has increased, reversing a long-term pattern of decline; participation rates for older women have increased dramatically as well. While better health, more education, and changes in labor-supply behavior of married couples may have affected this trend, these factors alone cannot explain the magnitude of the employment increase or its large variation across countries. The studies in this volume explore how financial incentives to work at older ages have evolved as a result of public pension reforms since 1980 and how these changes have affected retirement behavior. Utilizing a common template to analyze the developments across countries, the findings suggest that social security reforms have strengthened the financial returns to working at older ages and that these enhanced financial incentives have contributed to the rise in late-life employment.

**Pension Fund Capitalism** - Leokadia Oręziak 2022-04-07

This book examines the origins and consequences of so-called pension fund capitalism, which has spread around the world since 1981, when the pension system was completely privatized in Chile. The author highlights the driving forces behind the privatization of pensions, its forms and tools used in practice, and the risks and costs related to private pensions. The reader can also learn about the experiences of various developed countries (including the USA, Canada, Australia, and Germany), as well as Latin American (including Chile) and Eastern European countries, related to the privatization of pensions. Particular attention is paid to Poland as an example of a country where such privatization failed completely. This book provides a source of serious reflection on what this privatization has led to, what its real economic and social consequences are and what the likelihood is of reversing it and strengthening the public pension system. Academic researchers and students of economics and finance, as well as social and political sciences, will find the book invaluable in understanding the problems arising from the privatization of pensions. It will also be of interest to professionals: institutions that shape or influence economic and social policy, including political parties, trade unions, non-governmental organizations, the media, and institutions operating on the financial market.

**Canada: 2013 Article IV Consultation** - International Monetary Fund. Western Hemisphere Dept. 2014-02-03

This 2013 Article IV Consultation highlights that the Canadian economy strengthened in 2013 after a subdued performance in 2012, but the underlying growth has remained modest. Despite the depreciating exchange rate, non-energy exports remained well below the levels reached after earlier recessions. The housing market has cooled, owing in part to macro-prudential measures adopted in the past. Economic growth is expected to accelerate to 2¼ percent in 2014, up from an estimated 1¾ percent in 2013. Canada's export growth should benefit from the projected pick-up in U.S. growth in

2014, boosting business investment.

Struggling for Social Citizenship - Michael J. Prince 2016-05-01

The Canada Pension Plan disability benefit is a monthly payment available to disabled citizens who have contributed to the CPP and are unable to work regularly at any job. Covering the program's origins, early implementation, liberalization of benefits, and more recent restraint and reorientation of this program, *Struggling for Social Citizenship* is the first detailed examination of the single largest public contributory disability plan in the country. Focusing on broad policy trends and program developments and highlighting the role of cabinet ministers, members of Parliament, public servants, policy advisors, and other political actors, Michael Prince examines the pension reform agendas and records of the Pearson, Trudeau, Mulroney, Chrétien, Martin, and Harper prime ministerial eras. Shedding light on the immediate world of applicants and clients of the CPP disability benefit, this study reviews academic literature and government documents, features interviews with officials, and provides an analysis of administrative data regarding trends in expenditures, caseloads, decisions, and appeals related to CPP disability benefits. *Struggling for Social Citizenship* looks into the ways in which disability has been defined in programs and distinguished from ability in given periods, how these distinctions have operated, been administered, contested and regulated, as well as how, through income programs, disability is a social construct and administrative category. Weaving together literature on social policy, political science, and disability studies, *Struggling for Social Citizenship* produces an innovative evaluation of Canadian citizenship and social rights.

**Reframing Finance** - Ashby Monk 2017-08-08

Since the 2008 financial crisis, beneficiary organizations—like pension funds, sovereign wealth funds, endowments, and foundations—have been seeking ways to mitigate the risk of their investments and make better financial decisions. For them, Reframing Finance offers a path forward. This book argues that institutional investors would better serve their long-term goals by putting money into large-scale, future-facing projects such as infrastructure, green energy, innovation in agriculture, and real estate development. At the same time, redirecting long-term investments would close significant financial gaps that government cannot. Drawing on key contributions in economic sociology, social network theory, and economics, the book conceptualizes a collaborative model of investment that is already becoming increasingly common: Large investors contribute more directly to private market assets, while financial intermediaries seek to foster co-investment partnerships, better aligning incentives for all. A combination of rich case studies and rigorous theory enables asset owners to move toward more efficient, private-market investing, while also laying groundwork for research at the frontier of finance.

The Real Estate Retirement Plan - Calum Ross 2017-02-25

A Globe and Mail Bestseller! A guide for Canadians on how to use real estate as an investment and retirement solution. Leveraging equity in a principal residence and using it wisely to purchase rental property is the solution to a safe, secure retirement for millions of Canadians. Many Canadians who own their home have never considered buying a second property. And nearly one-third of retirees are worried about running out of money. The Real Estate Retirement Plan shows how homeowners can use the tools already available to them — their mortgages — to access the initial capital to invest and prepare for their retirement. This is a proven, validated antidote to today's historically low savings rates, poor current rates of return, and pressure on CPP and health care. With examples and a detailed discussion of the principles and mechanics, Calum Ross and Simon Giannini demystify real-estate investing and make an irrefutable case for borrowing to invest.
