Image Analysis in Histology - Richard Wootton 1995-05-11

This volume provides a timely and useful introduction to the theory and practical application of image analysis in histology. This powerful research technique can be used to detect not only stored products in a cell (immunocytochemistry) but the synthetic machinery and the genes that control it (in situ hybridisation), as well as the specific binding sites that act as receptors for a molecule following its release (in vitro autoradiography). The book provides a good introduction for beginners before looking in greater detail at more advanced material in selected areas. The volume highlights the importance of technique in gathering quantitative information. The book is divided into four sections: introductory material, image acquisition, image processing, and applications. The applications areas include quantitative immunochemistry, quantification of nerves and neurotransmitters and automated grain counting in in situ hybridisation histochemistry.

[Where We Come From](#) - Oscar Cásares 2020-04-07

ONE OF KIRKUS REVIEWS' BEST BOOKS OF THE YEAR "A richly conceived and devastating book about the border." —Houston Chronicle From a distance, the towns along the U.S.-Mexican border have dangerous reputations, and Brownsville is no different. But to twelve-year-old Orly, it's simply where his godmother Nina lives—and where he is being forced to stay the summer after his mother's sudden death. Nina, however, has a secret: she's providing refuge for a young immigrant boy named Daniel, for whom traveling to America has meant trading one set of dangers for another. Separated from the violent human traffickers who brought him across the border and pursued by the authorities, Daniel must stay completely hidden. And Orly's arrival threatens to put them all at risk of exposure. Tackling the crisis of U.S. immigration policy from a deeply human angle, *Where We Come From* explores through an intimate lens the ways that family history shapes us, how secrets can burden us, and how finding compassion and understanding for others can ultimately set us free.

The local constabulary wastes no time reaching out to Scotland Yard, which sends its best man: the easygoing detective-inspector Littlejohn. To Mr. Tate Howard, You are quite possibly the most infuriating, annoying and grumpy man I've ever met in my life. I thought it was time that someone addressed your big head and told you straight to your face that you're not all that. Just because you have an Ivy league education doesn't mean you're the smartest man in the world. In fact, I'm not even sure if you would have gotten in if you didn't have rich parents. Yes, I went there. Every woman doesn't want to sleep with you and I'm sure you're not even good in bed. And I'm someone that would know. From, Your Secret Not Admirer

Kissing Architecture - Sylvia Lavin 2011-05-09

Kissing Architecture explores the mutual attraction between architecture and other forms of contemporary art. In this fresh, insightful, and beautifully illustrated book, renowned architectural critic and scholar Sylvia Lavin develops the concept of "kissing" to describe the growing intimacy between architecture and new types of art--particularly multimedia installations that take place in and on the surfaces of buildings--and to capture the sensual charge that is being designed and built into architectural surfaces and interior spaces today. Initiating readers into the guilty pleasures of architecture that abandons the narrow focus on function, Lavin looks at recent work by Pipilotti Rist, Doug Aitken, the firm Diller Scofidio + Renfro, and others who choose instead to embrace the viewer in powerful affects and visual and sensory atmospheres. Kissing Architecture is the first book in a cutting-edge new series of short, focused arguments written by leading critics, historians, theorists, and practitioners from the world of urban development and contemporary architecture and design. These books are intended to spark vigorous debate. They stake out the positions that will help shape the architecture and urbanism of tomorrow. Addressing one of the most spectacular and significant developments in the current cultural scene, Kissing Architecture is an entertainingly irreverent and disarmingly incisive book that offers an entirely new way of seeing--and experiencing--architecture in the age after representation.

My sister never makes the best decisions, always makes messes to clean up, and it's finally time for me to have my own life. But when she comes to Paris for a visit...she brings trouble with her. Death Waits in the Dark - Mark Edward Langley 2020-08-04

It took all of thirty seconds for two shots to bring the world of Margaret Tabaaha crashing down around her. After losing her husband in Afghanistan during the first year of Operation Enduring Freedom, her two sons were all she had left. Now they had been taken from her violently, deliberately, plunging her into a whiskey bottle and stripping away her reason for living. When Arthur Nakai receives a call from his first love, Margaret, her voice pleading for his help, it comes as he is attending a wake for one of the men he considered a brother from his days in the Marines 6th LAR Wolf Pack Battalion. Feeling a deep and responsible obligation to help her, Arthur soon finds himself involved in the multi-billion-dollar world of the oil and gas industry and coming face-to-face with an old adversary, Elias Dayton. Their paths had crossed when Arthur was a member of the Shadow Wolves, an elite tactical unit within US Customs and Border Protection. Now Dayton runs Patriot Security, a Blackwater-type firm that keeps the oil rigs, gas wells, and man camps secure from the Water Protectors, protesters pushing to stop the fracking and poisoning of Native lands. As Arthur works through the case from his end, Navajo police chief Jake Bilagody tackles it from another angle, looking into the strained relationship between the oil company and the Navajo people, all while searching for a missing Navajo man that may have become an unwilling piece on the reservation checkerboard. But when Arthur learns the identity of the boys' killer, he struggles to make sense of it. Because if the clues are right, he will be forced to make a decision that will haunt him for the rest of his life.

Horizons in Neuropsychopharmacology

Introduction to Tumor Biology - I. De Wever 1999

This book offers clinical oncologists an introduction to some selected topics of tumor biology where important progress has been made during the last decade. The concept is rather unique because it combines advances in clinical pathology, genetics, molecular oncology and immunology. The first two chapters deal with the genetic and molecular basis of malignant transformation on cellular level: DNA damage, mutations and repair mechanisms, oncogenes and tumor suppressor genes. The growth of a tumor cell population depends not only on cell division, but also on deregulation of apoptosis (chapter 3). Most clinical tumors are characterized by heterogeneity caused by different degrees of differentiation in different cell clones as illustrated for soft tissue tumors in chapter 4. The following chapters explain the multistep process of local tumor progression in gastro-intestinal cancers and malignant melanoma. Cellular and molecular aspects of metastases are dealt with in chapter 7. But host cells react to tumor cells and specific T-cell defined antigens offer a perspective for cancer vaccine development as reviewed in the last chapter. The book is timely because new diagnostic and therapeutic applications based on molecular oncology will reach the clinic at ever increasing pace.

Inelastic Analysis of Solids and Structures - M. Kojic 2006-03-30

Inelastic Analysis of Solids and Structures presents in a unified manner the physical and theoretical background of inelastic material models and computational methods, and illustrates the behavior of the models in typical engineering conditions. The book describes experimental observations and principles of mechanics, and efficient computational algorithms for stress calculations as typically performed in finite element analysis. The theoretical background is given to an extent necessary to describe the commonly employed material models in metal isotropic and orthotropic plasticity, thermoplasticity and viscoplasticity, and the plasticity of geological materials. The computational algorithms are developed in a unified manner with some detailed derivations of the algorithmic relations. Many solved examples are presented, which are designed to give insight into the material behavior in various engineering conditions, and to demonstrate the application of the computational algorithms.

Code Name: Rook - Sawyer Bennett 2020-10-27

Being a highly skilled operative for a company like Jameson Force Security is exhilarating and important work...until it comes time to date. Now I need to save my girl and hope I can save my marriage too. Let's just say I have some serious explaining to do.

Investigative Journalism in China - David Bandurski 2010-06-01

Despite persistent pressure from state censors and other tools of political control, investigative journalism has flourished in China over the last decade. This volume offers a comprehensive, first-hand look at investigative journalism in China, including insider accounts from reporters behind some of China's top stories in recent years. While many outsiders hold on to the stereotype of Chinese journalists as docile, subservient Party hacks, a number of brave Chinese reporters have exposed corruption and official misconduct with striking ingenuity and often at considerable personal sacrifice. Subjects have included officials pilfering state funds, directors of public charities pocketing private donations, businesses fleecing unsuspecting consumers - even the misdeeds of journalists themselves. These case studies address critical issues of commercialization of the media, the development of ethical journalism practices, the rising specter of "news blackmail," negotiating China's mystifying bureaucracy, the dangers of libel suits, and how political pressures impact different stories. During fellowships at the Journalism & Media Studies Centre of the University of Hong Kong, these narratives and other background materials were fact-checked and edited by JMSC staff to address critical issues related to the media transitions currently under way in the PRC. This engaging narrative gives readers a vivid sense of how journalism is practiced in China. --David Bandurski is a scholar at the University of Hong Kong's China Media Project, a research and fellowship initiative of the Journalism & Media Studies Centre. Martin Hala has taught journalism at the Universities in Prague and Bratislava. -
