Corporate Investment Decisions and Economic Analysis - Denis Babusiaux 2005

The aim of this book is to help readers assimilate the concepts and methods for investment decision and project evaluation. It offers a wide range of exercises, problems and case studies taken from business, which are the fruit of many years of teaching, consulting and research. Some are direct application of basics, others require a higher degree of reflection for more complex applications. Our approach borrows elements from microeconomics, engineering economics and finance theory. This book is suited to both professionals and students who seek to master capital budgeting techniques. A review of essential points is proposed at the beginning of each chapter and key methodological elements are recalled in the solutions.

[Optimal Expansion of a water Resources system](#) - D.T. O'Laoghaire 2012-12-02

Optimal Expansion of a Water Resources System describes a methodology that can be used in water resources planning taking into account both water quantity and quality while still remaining computationally

tractable. It is concerned with the optimal expansion of a realistic water resources system to meet an increasing demand for municipal and industrial use, irrigation, energy, and recreation over a planning horizon of T_{max} years. This book comprises six chapters, with an introductory chapter that discusses such topics as development of water resources, the systems approach to solving water resources problems, and techniques for the optimization of a water resources system. The following chapters then discuss formulating the problem of the optimal expansion of an existing water resources system; a procedure for solving the optimal expansion problem; and application of the optimization algorithm to a water resources system. The remaining chapters discuss the sensitivity of planning decisions in river basin management; and how to incorporate water quality and pollution considerations into the model of the water resources system. This book will be of interest to practitioners in the fields of systems philosophy and water quantity studies.

Capital Budgeting Valuation - H. Kent Baker 2011-06-28

An essential guide to valuation techniques and financial analysis With the collapse of the economy and financial systems, many institutions are reevaluating what they are willing to spend money on. Project valuation is key to both cost effectiveness measures and shareholder value. The purpose of this book is to provide a comprehensive examination of critical capital budgeting topics. Coverage extends from discussing basic concepts, principles, and techniques to their application to increasingly complex, real-world situations. Throughout, the book emphasizes how financially sound capital budgeting facilitates the

process of value creation and discusses why various theories make sense and how firms can use them to solve problems and create wealth. Offers a strategic focus on the application of various techniques and approaches related to a firm's overall strategy Provides coverage of international topics based on the premise that managers should view business from a global perspective Emphasizes the importance of using real options Comprised of contributed chapters from both experienced professionals and academics, Capital Budgeting Valuation offers a variety of perspectives and a rich interplay of ideas related to this important financial discipline.

Cost of Capital Workbook - Shannon P. Pratt 2002-10-25

Proven, practical techniques for estimating the cost of capital "I would recommend Cost of Capital and the companion Cost of Capital Workbook as excellent tools for passing the various professional exams that lead to valuation accreditations and designations." -James R. Hitchner, Phillips Hitchner Group, Inc., Atlanta, Georgia "As a discussion leader for the AICPA ABV exam review course, this set of questions is perfect for people to use for practice for that exam and others (ASA and NACVA from my experience), for that matter. The mix of formats, including exercises, is great." -Ronald L. Seigneur, Seigneur & Company, PC, CPAs, Lakewood, Colorado "The exercises are particularly good." -Stephen J. Bravo, Apogee Business Valuations, Framingham, Massachusetts Cost of capital estimation has long been recognized as one of the most critical elements in business valuation, capital budgeting, feasibility studies, and corporate finance decisions-it is also, however, one of the most difficult procedures to perform and assess. The Cost of Capital Workbook will help financial officers of small, midsize, and even multibillion dollar companies estimate required rates of return and tackle the myriad issues associated with cost of capital. It will also help business valuation professionals of all levels to gain a greater understanding of cost of capital concepts and procedures. Using hands-on exercises designed to implement procedures described in Cost of Capital, Second Edition, the Cost of Capital Workbook provides a deeper understanding of cost of capital problems by offering a practical experience in applying solutions. The Workbook includes multiple choice, true or false, and fill-in-the-blank questions as well as: * Exercises estimating cost of capital by the build-up model and the Capital Asset Pricing Model * Exercises using Ibbotson Associates' Stocks, Bonds, Bills, and Inflation Valuation Edition Yearbook * Applications using discounted cash flow (DCF) methods, based on forecasted earnings and cash flows * Examples covering valuing a business by both equity and invested capital procedures, making project selections, and utility-rate determinations * Numerous

exercises using Ibbotson data from the Cost of Capital Workbook Business appraisers, corporate finance officers, CPAs, and attorneys will find the Cost of Capital Workbook an indispensable guide to the effective estimation and application of cost of capital.

Corporate Governance, Capital Markets, and Capital Budgeting - Baliira Kalyebara 2013-07-31

The primary contribution of this book is to integrate the important disciplines which simultaneously impact the investment appraisal process. The book presents a study that develops a new approach to investment appraisal which uses a multiple objective linear programming (MOLP) model to integrate the selected disciplines which include capital markets, corporate governance and capital budgeting. The research covers two case studies, one in the e-commerce sector and another in the airline industry in which the above disciplines are integrated. Readers from the areas of corporate governance, regulation, and accounting would find the survey of different approaches and the new integrated optimization approach particularly useful.

Economic and Financial Analysis for Criminal Justice Organizations - Daniel Adrian Doss 2013-10-28

From small law offices to federal agencies, all entities within the justice system are governed by complicated economic factors and face daily financial decision-making. A complement to Strategic Finance for Criminal Justice Organizations, this volume considers the justice system from a variety of economic and financial perspectives and introduces quantitative methods designed to improve the efficiency and effectiveness of organizations in both the non-profit and for-profit sectors. Using only a minimum of theory, Economic and Financial Analysis for Criminal Justice Organizations demonstrates how to make decisions in the justice system using multiple financial and economic models. Designed for readers with little knowledge of advanced mathematics, quantitative analysis, or spreadsheets, the book presents examples using straightforward, step-by-step processes with Excel and Linux Calc spreadsheet software. A variety of different types of decisions are considered, ranging from municipal bond issuance and valuation necessary for public revenues, pension planning, capital investment, determining the best use of monies toward construction projects, and other resource planning, allocation, and forecasting issues. From municipalities and police departments to for-profit prisons and security firms, the quantitative methods presented are designed to improve the efficiency and effectiveness of all organizations in the justice domain.

Financial Management for Decision Making - Harold Bierman 2003

Provides a comprehensive introduction to corporate finance. This is a reprint

Advanced Capital Budgeting - Harold Bierman, Jr. 2014-02-04

Written by authors of established texts in this area, this book is a companion volume to the classic *The Capital Budgeting Decision*. Exploring this key topic in corporate finance the authors examine the complexities of capital budgeting as well as the opportunities to improve the decision process where risk and time are important elements. Containing 'Global Aspects' sections that cover cross-border decision-making, this book also emphasizes the application of capital budgeting techniques to a variety of issues, including the hugely significant 'buy versus lease' decision that cost corporations billions each year. It gives in-depth coverage to: real options - the value of a project must take into consideration the flexibility that it provides management, acknowledging the option of making decisions in the future when more information is available decomposing cash flows - a project consists of many series of cash flows and each series deserves its own specific risk-adjusted discount rate. Decomposing the cash flows of an investment highlights the fact that while managers are generally aware that divisions and projects have different risks, too often they neglect the fact that the cash flow components may also have different risks, with severe consequences on the quality of the decision-making. Designed to assist those making business decisions at all levels, this volume is essential reading for all those working in or studying capital budgeting.
