Displaying Time - Rebecca M. Brown 2017-05-31

From the fluttering fabric of a tent, to the blurred motion of the potter's wheel, to the rhythm of a horse puppet's wooden hooves—these scenes make up a set of mid-1980s art exhibitions as part of the U.S. Festival of India. The festival was conceived at a meeting between Indira Gandhi and Ronald Reagan to strengthen relations between the two countries at a time of late Cold War tensions and global economic change, when America's image of India was as a place of desperate poverty and spectacular fantasy. *Displaying Time* unpacks the intimate, small-scale durations of time at work in the gallery from the transformation of clay into ceramic to the one-on-one, personal encounters between museum visitors and artists. Using extensive archival research and interviews with artists, curators, diplomats, and visitors, Rebecca Brown analyzes a selection of museum shows that were part of the Festival of India to unfurl new exhibitionary modes: the time of transformation, of interruption, of potential and the future, as well as the contemporary and the now.

Can We Talk? presents a dream team of scholars and journalists who ask: Is politics really as nasty as many news commentators perceive? **Anti-Semitism and Psychiatry** - H. Steven Moffic 2020-02-25

Following World War II and the exposure of the concentration camps, psychiatry turned its attention to a vast range of cultural concerns with results that seemed to indicate a decline of stigma over time. However, it is now clear that whatever drives prejudices, especially in the case of anti-Semitism, was just dormant and perhaps not fully understood. Hate crimes and anti-Semitism broad recently re-emerged in Europe, and the United States followed shortly thereafter. The US Federal Bureau of investigation reports that New York City, which is still considered the most Jewish-friendly region in the US, experienced a 22% spike in anti-Semitic hate crimes in 2018 alone, with more extremes in other regions of the country. Neo-Nazi groups have grown stronger in the United States and abroad, often resulting in organized acts of violence. The recent Tree of Life synagogue shooting in Pittsburgh, PA demonstrated that these acts are not limited to one-on-one interactions, but sometimes as prolific, large-scale act. The medical community is not immune from biases either. The Cleveland Clinic recently fired a young doctor after she publicly declared her wishes to inject Jewish patients with lethal substances, which is only one of many hateful comments she made on social media over the course of several years. Psychiatrists in particular grapple with this as they try to serve patients of both Jewish and non-Jewish descent who struggle to process these acts of hate. Despite all of this, there is no training and no resource to guide medical professionals through these challenges. The editors of the recent Springer book, *Islamophobia and Psychiatry*, recognize this gap in the literature and seek to develop another high-quality text to meet this need. Written by expert clinicians in global regions where these incidents are most prevalent, the book seeks to be neither political nor opinion-based; instead, the text takes an innovative cross-cultural psychiatric interaction, similar to what was done with Springer's new *Islamophobia* book. Coverage will range from foci on the social psychiatric aspects of anti-Semitism to how it may in turn infuse clinical encounters between patients and clinicians. Written by experts in this area, the insight and expertise of psychiatrists from a variety of cultural and religious backgrounds will focus on what psychiatrists need to know to combat the negative mental health impact that increasingly rise out of this particular phenomenon. Such a multi-cultural psychiatric approach has never been taken before for this topic. This discourse is the foundation for the primary goal of this book: to develop the tools needed to improve clinical outcomes for patients. Hence, this book aims to present an updated, comprehensive bio-psychosocial perspective on anti-Semitism at the interface of clinical psychiatry.

**The Riddle of the Rosicrucians** - Manly P. Hall 2013-10

This is a new release of the original 1951 edition.

*The Buccaneers* - Edith Wharton 1994-10-01

Set in the 1870s, the same period as Wharton's *The Age of Innocence*, *The Buccaneers* is about five wealthy American girls denied entry into New York Society because their parents' money is too new. At the suggestion of their clever governess, the girls sail to London, where they marry lords, earls, and dukes who find their beauty charming—and their wealth extremely useful. After Wharton's death in 1937, *The Christian Science Monitor* said, "If it could have been completed, *The Buccaneers* would doubtless stand among the richest and most sophisticated of Wharton's novels." Now, with wit and imagination, Marion Mainwaring

has finished the story, taking her cue from Wharton's own synopsis. It is a novel any Wharton fan will celebrate and any romantic reader will love. This is the richly engaging story of Nan St. George and guy Thwarte, an American heiress and an English aristocrat, whose love breaks the rules of both their societies.

**Game-texts** - Erskine Lane 1978

**Real Deceptions** - Jennifer Friedlander 2017-07-31

Real Deceptions develops a new theory of realism through close consideration of myriad contemporary art, media, and cultural practices. Rather than focusing on transgressing deceptions which distort reality, the book argues that reality lies within the deceptions themselves. That is to say, realism's political potential emerges not by revealing deception but precisely by staging deceptions--particularly deceptions that imperil the very categories of true and false. In lieu of perceiving deception as an obstacle to truth, it shows how deception functions as the truth's necessary conduit. Categories invoked in realist works, such as trompe l'oeil, illusion, hypervirtuality, and simulation help to establish how realism can be seen as moving from the creation of mere epistemological uncertainty to radical ontologically-based indeterminacy. The book cultivates this schema by considering productive connections between insights from Jacques Lacan and Jacques Rancière. Real Deceptions not only applies these theoretical frameworks to art and media examples, but also engages in the reverse move of using the "cases" to further the theories. This dual approach points to the ways in which efforts to produce realist representations often give rise to the destabilizing Real.

**Toxic Airs** - James Rodger Fleming 2014-03-23

Toxic Airs brings together historians of medicine, environmental historians, historians of science and technology, and interdisciplinary scholars to address atmospheric issues on a spectrum of scales from body to place to planet. The chapters analyze airborne and atmospheric threats posed to humans, and contributors demonstrate how conceptions of toxicity have evolved and how humans have both created and mitigated toxins in the air. Specific topics discussed include medieval beliefs in the pestilent breath of witches, malarial theory in India, domestic and military use of tear gas, Gulf War Syndrome, Los Angeles smog, automotive emissions control, the epidemiological effects of air pollution, transboundary air pollution, ozone depletion, the contributions of contemporary artists to climate awareness, and the toxic history of carbon "die"-oxide. Overall, the essays provide a wide-ranging historical study of interest to students and scholars of many disciplines.

**The New Digital Age** - Eric Schmidt 2013-04-25

'This is the most important - and fascinating - book yet written about how the digital age will affect our world' Walter Isaacson, author of Steve Jobs From two leading thinkers, the widely anticipated book that describes a new, hugely connected world of the future, full of challenges and benefits which are ours to meet and harness. The New Digital Age is the product of an unparalleled collaboration: full of the brilliant insights of one of Silicon Valley's great innovators - what Bill Gates was to Microsoft and Steve Jobs was to Apple, Schmidt (along with Larry Page and Sergey Brin) was to Google - and the Director of Google Ideas, Jared Cohen, formerly an advisor to both Secretaries of State Condoleezza Rice and Hillary Clinton. Never before has the future been so vividly and transparently imagined. From technologies that will change lives (information systems that greatly increase productivity, safety and our quality of life, thought-controlled motion technology that can revolutionise medical procedures, and near-perfect translation technology that allows us to have more diversified interactions) to our most important future considerations (curating our online identity and fighting those who would do harm with it) to the widespread political change that will transform the globe (through transformations in conflict, increasingly active and global citizenries, a new wave of cyber-terrorism and states operating simultaneously in the physical and virtual realms) to the ever present threats to our privacy and security, Schmidt and Cohen outline in great detail and scope all the promise and peril awaiting us in the coming decades. A breakthrough book - pragmatic, inspirational and totally fascinating. Whether a government, a business or an individual, we must understand technology if we want to understand the future. 'A brilliant guidebook for the next century . . . Schmidt and Cohen offer a dazzling glimpse into how the new digital revolution is changing our lives' Richard Branson
