*Radar Instruction Manual* - United States. Maritime Administration 2005

Since 1958 the Maritime Administration has continuously conducted instructions in use of collision avoidance radar for qualified U.S. seafaring personnel and representatives of interested Federal and State Agencies. Beginning in 1963, to facilitate the expansion of training capabilities and at the same time to provide the most modern techniques in training methods, radar simulators were installed in Maritime Administration's three region schools. It soon became apparent that to properly instruct the trainees, even with the advanced equipment, a standardize up-to-date instruction manual was needed. The first manual was later revised to serve both as a classroom textbook and as an onboard reference handbook. This newly updated manual, the fourth revision, in keeping with Maritime Administration policy, has been restructured to include improved and more effective methods of plotting techniques for use in Ocean, Great Lakes, Coastwise and Inland Waters navigation. **Voices of Hope** - Carole B. Shmurak 1998

Fueled by media reports of gender bias in the schools, the debate over single sex education has been recently renewed. "Voices of Hope" asks for a reconsideration of the framing of that debate. For whom is single sex education better? For the attainment of which goals? What do girls gain by being schooled with male peers? What is lost? In this longitudinal study of more than fifty high school girls at four New England independent schools, Carole B. Shmurak follows their development from ninth grade through the first year of college. Case studies capture the girls' own voices as they describe their hopes for their futures and the events that subsequently affect those futures.
