What's so great about Jasper Johns's Flag? And who was Whistler's mother, anyway? Art history is filled with paintings that shocked, intrigued, enraged, and mystified their audiences--paintings that exemplified the period in which they were created and forever changed the way we think. The Bhagavad Gita - Jack Hawley 2011-03-10

The Bhagavad Gita has been called India's greatest contribution to the world. For more than five thousand years, this great scripture has shown millions in the East how to fill their lives with serenity and love. In these pages, Jack Hawley brings these ancient secrets to Western seekers in a beautiful prose version that makes the story of the Gita clear and exciting, and makes its truths understandable and easy to apply to our busy lives. The Gita is a universal love song sung by God to His friend man. It can't be confined by any

creed. It is a statement of the truths at the core of what we all already believe, only it makes those truths clearer, so they become immediately useful in our daily lives. These truths are for our hearts, not just our heads. The Gita is more than just a book, more than mere words or concepts. There is an accumulated potency in it. To read the Gita is to be inspired in the true sense of the term: to be "inspired," to inhale the ancient and ever-new breath of spiritual energy.

The Returns of Odysseus - Irad Malkin 1998-11-30

This remarkably rich and multifaceted study of early Greek exploration makes an original contribution to current discussions of the encounters between Greeks and non-Greeks. Focusing in particular on myths about Odysseus and other heroes who visited foreign lands on their mythical voyages homeward after the Trojan War, Irad Malkin shows how these stories functioned to mediate encounters and conceptualize ethnicity and identity during the Archaic and Classical periods. Synthesizing a wide range of archaeological, mythological, and literary sources, this exceptionally learned book strengthens our understanding of early Greek exploration and city-founding along the coasts of the Western Mediterranean, reconceptualizes the role of myth in ancient societies, and revitalizes our understanding of ethnicity in antiquity. Malkin shows how the figure of Odysseus became a proto-colonial hero whose influence transcended the Greek-speaking world. The return-myths constituted a generative mythology, giving rise to oral poems, stories, iconographic imagery, rituals, historiographical interpretation, and the articulation of ethnic identities. Reassessing the role of Homer and alternative return-myths, the book argues for the active historical function of myth and collective representations and traces their changing roles through a spectrum of colonial perceptions—from the proto-colonial, through justifications of expansion and annexation, and up to decolonization.

Victims as Offenders - Susan Miller 2005-09-22

Arrests of women for assault increased more than 40 percent over the past decade, while male arrests for this offense have fallen by about one percent. Some studies report that for the first time ever the rate of reported intimate partner abuse among men and women is nearly equal. Susan L. Miller's timely book explores the important questions raised by these startling statistics. Are women finally closing the gender gap on violence? Or does this phenomenon reflect a backlash shaped by men who batter? How do abusive men use the criminal justice system to increase control over their wives? Do police, courts, and treatment providers support aggressive arrest policies for women? Are these women "victims" or "offenders"? In answering these questions, Miller draws on extensive data from a study of police behavior in the field, interviews with criminal justice professionals and social service providers, and participant observation of female offender programs. She offers a critical analysis of the theoretical assumptions framing the study of violence and provides insight into the often contradictory implications of the mandatory and pro-arrest policies enacted in the 1980s and 1990s. Miller argues that these enforcement strategies, designed to protect women, have often victimized women in different ways. Without sensationalizing, Miller unveils a reality that looks very different from what current statistics on domestic violence imply.

The Ancient Messenians - Nino Luraghi 2008-05-01

Early in the archaic period of Greek history, Messenia was annexed and partially settled by its powerful neighbour, Sparta. Achieving independence in the fourth century BC, the inhabitants of Messenia set about trying to forge an identity for themselves separate from their previous identity as Spartan subjects, refunctionalising or simply erasing their Spartan heritage. Professor Luraghi provides a thorough examination of the history of Messenian identity and consequently addresses a range of questions and issues whose interest and importance have only been widely recognised by ancient historians during the last decade. By a detailed scrutiny of the ancient written sources and the archaeological evidence, the book reconstructs how the Messenians perceived and constructed their own ethnicity at different points in time, by applying to Messenian ethnicity insights developed by anthropologists and early medieval historians.

Gender Identity, Equity, and Violence - Geraldine B. Stahly 2007

The authors of the thirteen chapters in this volume bring excitement and innovations to teaching about gender from a wide range of theoretical and discipline perspectives. They exhibit the inclusiveness that is central to feminist pedagogy—a perspective that centers the educational enterprise in the analysis of the interconnectedness of social categories that have traditionally divided and given root to inequality and oppression and aims for no less than social transformation. Empowerment is a core value in gender education and the experiential approach nurtures that goal. This volume provides many examples of the power of learning through experience as the authors demonstrate that, "...the authority of the feminist teacher as intellectual and theorist finds expression in the goal of making students themselves theorists of their own lives by interrogating and analyzing their own experience." (Weiler, 1991) To stimulate the adaptation of the approaches described in these books, each volume includes an Activity / Methodology table that summarizes key elements of each example, such as class size, pedagogy, and other disciplinary applications. [Click here for the table to this title.](#)

After Modernist Painting - Craig Staff 2013-03-14

Painting has often been declared dead since the 1960s and yet it refuses to die. Even the status and continued legitimacy of the medium has been repeatedly placed in question. As such, painting has had to continually redefine its own parameters and re-negotiate for itself a critical position within a broader, more discursive set of discourses. Taking the American Clement Greenberg's 'Modernist Painting' as a point of departure, *After Modernist Painting* will be both a historical survey and a critical re-evaluation of the contested and contingent nature of the medium of painting over the last 50 years. Presenting the first critical account of painting, rather than art generally, this book provides a timely exploration of what has remained a persistent and protean medium. Craig Staff focuses on certain developments including the relationship of painting to Conceptual Art and Minimalism, the pronouncement of paintings' alleged death, its response to Installation Art's foregrounding of site, how it was able to interpret ideas around appropriation, simulation and hybridity and how today painting can be understood as both imaging and imagining the digital. *After Modernist Painting* is an invaluable resource for those seeking to understand the themes and issues that have pertained to painting within the context of postmodernism and contemporary artistic practice.

Ethnic Identity in Greek Antiquity - Jonathan M. Hall 2000-06-26

In this book Jonathan Hall seeks to demonstrate that the ethnic groups of ancient Greece, like many ethnic groups throughout the world today, were not ultimately racial, linguistic, religious or cultural groups, but social groups whose 'origins' in extraneous territories were just as often imagined as they

were real. Adopting an explicitly anthropological point of view, he examines the evidence of literature, archaeology and linguistics to elucidate the nature of ethnic identity in ancient Greece. Rather than treating Greek ethnic groups as 'natural' or 'essential' - let alone 'racial' - entities, he emphasises the active, constructive and dynamic role of ethnography, genealogy, material culture and language in shaping ethnic consciousness. An introductory chapter outlines the history of the study of ethnicity in Greek antiquity.

Change Mummified - Philip Rosen 2001

Exploring the modern category of history in relation to film theory, film textuality, and film history, Change Mummified makes a persuasive argument for the centrality of historicity to film as well as the special importance of film in historical culture. What do we make of the concern for recovering the past that is consistently manifested in so many influential modes of cinema, from Hollywood to documentary and postcolonial film? How is film related to the many modern practices that define themselves as configuring pastness in the present, such as architectural preservation, theme parks, and, above all, professional historical research? What is the relation of history in film to other media such as television and digital imaging? How does emphasizing the connection between film and modern historicity affect the theorization and historicization of film and modern media culture? Pursuing the full implications of film as cultural production, Philip Rosen reconceptualizes modern historicity as a combination of characteristic epistemological structures on the one hand, and the social imperative to regulate or manage time on the other. Emphasizing a fundamental constellation of pursuit of the real, indexical signification and the need to control time, he interrogates a spectrum of film theory and film texts. His argument refocuses the category of temporality for film and cultural theory while rethinking the importance of historicity. An original and sustained meditation on the historiographic status of cinematic signs, Change Mummified is both an intervention in film and media studies and an argument for the continuing necessity of modern historical thinking in its contradictions.

The Governance of Privacy - Colin J. Bennett 2017-11-01

This book was published in 2003. This book offers a broad and incisive analysis of the governance of privacy protection with regard to personal information in

contemporary advanced industrial states. Based on research across many countries, it discusses the goals of privacy protection policy and the changing discourse surrounding the privacy issue, concerning risk, trust and social values. It analyzes at length the contemporary policy instruments that together comprise the inventory of possible solutions to the problem of privacy protection. It argues that privacy protection depends upon an integration of these instruments, but that any country's efforts are inescapably linked with the actions of others that operate outside its borders. The book concludes that, in a 'globalizing' world, this regulatory interdependence could lead either to a search for the highest possible standard of privacy protection, or to competitive deregulation, or to a more complex outcome reflecting the nature of the issue and its policy responses.

In the Forests of the Night - Amelia Atwater-Rhodes 2011-02-02

I was born to the name of Rachel Weatere in the year 1684, more than three hundred years ago. The one who changed me named me Risika, and Risika I became, though I never asked what it meant. I continue to call myself Risika, even though I was transformed into what I am against my will. By day, Risika sleeps in a shaded room in Concord, Massachusetts. By night, she hunts the streets of New York City. She is used to being alone. But now someone is following Risika. Someone has left her a black rose, the same sort of rose that sealed her fate three hundred years ago. Three hundred years ago Risika had a family -- a brother and a sister who loved her. Three hundred years ago she was human. Now she is a vampire, a powerful one. And her past has come back to torment her. This atmospheric, haunting tale marks the stunning debut of a promising fourteen-year-old novelist. From the Hardcover edition.
