Peer Interaction and Second Language Learning - Masatoshi Sato 2016-03-10

This volume represents the first collection of empirical studies focusing on peer interaction for L2 learning. These studies aim to unveil the impact of mediating variables such as task type, mode of interaction, and social relationships on learners' interactional behaviors and language development in this unique and pedagogically powerful learning context. To examine these issues, contributors employed quantitative, qualitative, and mixed-methods designs as well as cognitive, social, and sociocognitive theoretical frameworks. The majority of the studies are classroom based and were conducted in a rich array of settings covering five continents and encompassing a wide range of learner L1s and target languages. These settings include second and foreign language classrooms from primary to university level, content-based programs, online contexts, and after-school programs. To span the divide between research and practice, each study includes a section suggesting pedagogical implications.

CLIL in Action - María Luisa Pérez Cañado 2015-10-05

This volume explores the current position of CLIL on the three main fronts where it is attracting particular attention in specialized literature, namely, implementation, research, and teacher training. To this end, it presents evidence from national and international research projects, governmentally-financed pedagogical initiatives, grassroots experiences and investigations, and inter-institutional training programs which offer insights into how CLIL is working in action on the afore-mentioned three levels. The opening section of the book ("CLIL in action: Practical considerations") provides a window into how CLIL implementation is unravelling at the grassroots level vis-à-vis key aspects for CLIL development, such as the design of materials, the use of ICT, and the importance of extramural exposure. The second part ("The effects of CLIL on language learning: Research-based evidence") explores some key areas for future research, showcasing how engaging in research as a device that drives reflection is the best possible way to continue moving the CLIL agenda forward. Finally, in the third part ("Preparing teachers for CLIL: Practical

proposals”), the interface of research and pedagogy is discussed, as the former informs the latter in a clear instantiation of what Coyle (2011) terms “evidence-based practice” in setting necessary teacher training actions in place. As such, the volume addresses three burning issues in the CLIL scenario through practical and research-based proposals of tried-and-true CLIL development. If all three strands – implementation, research, and training – dovetail and progress in harmony, a solid template will be built for the future and the CLIL agenda will be pushed forward. By pooling together the insights of a set of researchers, teacher trainers, policy makers, and grassroots practitioners, this volume will contribute to this much-needed endeavour.

Designing Authenticity Into Language Learning Materials - Freda Mishan 2005

This book puts forward an authenticity-centred approach to the design of materials for language learning. The premise of the approach is that language learning should be based on authentic materials drawn from a variety of genres found in the target language culture, and that the learning tasks involving these materials should be correspondingly authentic, by entailing interactions that are consistent with the original communicative purpose of the authentic text. It provides both a theoretical grounding to the authenticity-centred approach, and demonstrates its practical application in a teaching task reference section. In outline, the book: Refines a definition of authenticity in the context of language pedagogy. Traces the historical background to authenticity in language learning back over one millennium. Grounds the use of authentic materials in language learning in L2 acquisition research. Gives a critical analysis of the authenticity of contemporary language study course-books. Discusses the use of seven authentic genres for language learning; broadcasting, newspapers, advertisements, music and song, film, literature and ICT (information and communications technology). Offers a set of practical principles for the design of authentic learning tasks. Includes a reference section providing step-by-step instruction for the design and classroom procedure of learning tasks for materials taken from each of the seven genres."

English as a Foreign Language for Deaf and Hard-of-Hearing Persons - Ewa Domagała-Zyśk 2016-09-23

Deaf and hard-of-hearing students form a specific group of foreign language learners. They need to use foreign languages just like their hearing peers if they want to enjoy the same benefits of globalization and technical advancements of today, yet they cannot take part in the same foreign language education. As sign language users, lip-readers or persons relying on hearing aids or cochlear implants in their everyday communication, they need special support in learning a foreign language. This book has been written by teachers and researchers involved in teaching English as a foreign language (EFL) to deaf and hard-of-hearing students in various different European countries, including the Czech Republic, France, Hungary, Norway, Poland, and Serbia. The chapters mirror both the authors' personal journeys through this field and give insight into various aspects of empirical research into the foreign language acquisition of hearing-impaired learners. They discuss mainly the issue of specific methodology for teaching EFL vocabulary, grammar, reading, writing and speaking to deaf and hard-of-hearing persons and the challenge of effective communication during the classes via sign language, cued speech or the oral approach. Special chapters are also devoted to EFL teachers' experience in

special schools for the deaf. Educators interested in practical advice, responses to challenges and worked-out solutions to problems will particularly welcome this book as a useful source of ideas. It will also help novice teachers embarking on their careers in English language education for deaf and hard-of-hearing children and adults.

Variability and Stability in Foreign and Second Language Learning Contexts - Liliana Piasecka 2011-12-08

This book contains a wide spectrum of topics organized within a relatively fixed framework of Applied Linguistics theory and practice, revolving around the concepts of stability and variability that capture the dynamic nature of the phenomena characterizing language, learning and teaching. The primary strength of individual chapters lies in the fact that the vast majority report original empirical studies carried out in diverse second/foreign language learning contexts – investigating interesting issues across various nationalities, ages, educational and professional groups of language learners, and teachers. The issues under scrutiny entail the ‘classic’ recurrent topics related to language learning and teaching, such as communicative competence, input, orality and literacy, learner characteristics and strategies, and teacher development – to mention just a few. In addition, ‘recent arrivals,’ to borrow a marketing metaphor, are also present, as the authors consider learning and teaching implications resulting from the status of English as a language of international communication, and discuss related concepts of intercultural competence along with language learners’ identity and creativity. The multilingual and multicultural contributors to the present volume are researchers – foreign and second language learners and teachers themselves –

who offer the reader a range of methodological designs that have been successfully used in Applied Linguistics research. The framework of stability and variability suggests that changes leading to progress and development derive from stable foundations that account for the sense of continuity and belonging in applied linguists' communities of practice.

Second Language Learning and Language Teaching - Vivian Cook 2016-05-05

Second Language Learning and Language Teaching provides an introduction to the application of second language acquisition research to language teaching. Assuming no previous background in second language acquisition or language teaching methods, this text starts by introducing readers to the basic issues of second language acquisition research. It then examines how people learn particular aspects of the second language, such as grammar, vocabulary, pronunciation and the writing system, and at the strategies they adopt in their learning and the differences between individuals. Final chapters look at second language learning in a broader context – the goals of language teaching and how teaching methods relate to SLA research. This newly updated fifth edition builds on the comprehensive scope of earlier editions while also addressing more recent developments in the field, particularly multilingual approaches to language teaching.
