Caring for the Newborn - Donald E. Greydanus 2021

"This book summarizes the state of cognoscibility regarding normal newborn care that has been accumulated over the past centuries, especially the 20th and now 21st century. The preface/introduction details historical concepts that have followed newborns over the millennia of Homo sapiens sapiens' existence, such as infanticide, breast feeding, swaddling, neonatal resuscitation, and principles of caring for newborns. The mortality rate of newborns has been reduced in many parts of the world in the past two centuries, and we have learned much about how to keep increasing numbers of newborns alive and healthy. This is especially seen when healthcare providers and society collaborate in this important endeavor that includes emphasizing known preventive principles. Current modern pediatric and perinatal treatments allow newborns in the current 21st century America to have a start on an overall life expectancy of 78.5 years (up to 76 years in males and 80.9 years in females) if they receive meticulous medical care, and even if they are born into a penurious state. Such deserved care and inevitable medical discoveries will only lengthen these life trajectories. This second edition updates principles of caring for the newborn that were identified in the first edition. It considers the newborn examination, newborn screening, safe-sleep concepts, mother and newborn skin-to-skin contact, effects of prenatal drug use, mental health issues in the newborn, maternal mood disorders, infant feeding, circumcision, anticipatory guidance, and concepts of surgery in the newborn. Also considered are selective disorders found in some newborns that includes newborn neurology, cardiology, pulmonology, nephrology, gastroenterology, endocrinology and dermatology"--

Counselling for Maternal and Newborn Health Care - World Health Organization 2010

The main aim of this practical Handbook is to strengthen counselling and communication skills of skilled attendants (SAs) and other health providers, helping them to effectively discuss with women, families and communities the key issues surrounding pregnancy, childbirth, postpartum, postnatal and post-abortion care. *Counselling for Maternal and Newborn Health Care* is divided into three main sections. Part 1 is an introduction which describes the aims and objectives and the general layout of the Handbook. Part 2 describes the counselling process and outlines the six key steps to effective counselling. It explores the counselling context and factors that influence this context including the socio-economic, gender, and cultural environment. A series of guiding principles is introduced and specific counselling skills are outlined. Part 3 focuses on different maternal and newborn health topics, including general care in the home during pregnancy; birth and emergency planning; danger signs in pregnancy; post-abortion

care; support during labor; postnatal care of the mother and newborn; family planning counselling; breastfeeding; women with HIV/AIDS; death and bereavement; women and violence; linking with the community. Each Session contains specific aims and objectives, clearly outlining the skills that will be developed and corresponding learning outcomes. Practical activities have been designed to encourage reflection, provoke discussions, build skills and ensure the local relevance of information. There is a review at the end of each session to ensure the SAs have understood the key points before they progress to subsequent sessions.

Early Essential Newborn Care - WHO Regional Office for the Western Pacific 2015-04-20

Approximately every two minutes a baby dies in the WHO Western Pacific Region. The majority of newborn deaths occur within the first few days, mostly from preventable causes. The high mortality and morbidity rates among newborns are related to inappropriate hospital and community practices that currently occur throughout the Region. Furthermore, newborn care has fallen into a gap between maternal care and child care. This Guide provides health professionals with a user-friendly, evidence-based protocol to essential newborn care--focusing on the first hours and days of life. The target users are skilled birth attendants including midwives, nurses and doctors, as well as others involved in caring for newborns. This pocket book provides a step-by-step guide to a core package of essential newborn care interventions that can be administered in all health-care settings. It also includes stabilization and referral of sick and preterm newborn infants. Intensive care of newborns is outside the scope of this pocket guide. This clinical practice guide is organized chronologically. It guides health workers through the standard precautions for essential newborn care practices, beginning at the intrapartum period with the process of preparing the delivery area, and emphasizing care practices in the first hours and days of a newborn's life. Each section has a color tab for easy reference.

Pocket Book of Hospital Care for Children - World Health Organization 2013

The Pocket Book is for use by doctors nurses and other health workers who are responsible for the care of young children at the first level referral hospitals. This second edition is based on evidence from several WHO updated and published clinical guidelines. It is for use in both inpatient and outpatient care in small hospitals with basic laboratory facilities and essential medicines. In some settings these guidelines can be used in any facilities where sick children are admitted for inpatient care. The Pocket Book is one of a series of documents and tools that support the Integrated Managem.

Contemporary Maternal-newborn Nursing Care - Patricia W. Ladewig 2017

For 2- and 4-year college-level nursing courses that cover pregnancy, birth, and the postpartum period. Help students think like maternal-newborn nurses Accurate, readable, and up-to-date, Contemporary Maternal-Newborn Nursing presents pregnancy and childbirth as normal life processes with family members as co-participants in care. This text thoroughly illuminates all aspects of maternal-newborn

nursing and the many opportunities for nurses to make a difference in a changing healthcare environment. After introducing key concepts, it progresses through the steps of the nursing process, clearly delineating nurses' roles throughout pregnancy, labor, birth, the newborn period, and postpartum care. For each, it presents basic theory followed by chapters on assessment and care for essentially healthy women or infants, and then by complications and treatment. Recurring themes include evidence-based practice, critical thinking, clinical decision-making, community-based care, patient and family teaching, safety, cultural competence, complementary/alternative therapies, and health promotion. This edition's significant updates include revisions reflecting the latest recommendations of AACN Baccalaureate Essentials, QSEN, the Institute of Medicine (IOM), and Healthy People 2020. Also available with MyNursingLab MyNursingLab is an online self-study and class preparation program designed to engage students and improve results. Its personalized learning path helps students think like nurses as they move beyond memorization to true understanding through application.

Fast Facts for the Neonatal Nurse, Second Edition - Michele R. Davidson, PhD, CNM, CFN, RN 2020-10-15
Written for novice neonatal nurses and those new to the NICU, this concise, easy-to-use resource delivers all the essentials of daily practice for the care of neonates and their families. Families experience dramatic transformations as roles develop and change during the newborn period. Throughout it all, they rely on the nurse's expertise, support, and encouragement to learn to care for their child and meet the newborn's most basic needs. *Fast Facts for the Neonatal Nurse, Second Edition* begins with a streamlined yet comprehensive review of normal newborn characteristics. Pregnancy, Childbirth, Postpartum, and Newborn Care - World Health Organization 2003

This guide provides a full range of updated, evidence-based norms and standards that will enable health care providers to give high quality care during pregnancy, delivery and in the postpartum period,

considering the needs of the mother and her newborn baby. All recommendations are for skilled attendants working at the primary level of health care, either at the facility or in the community. They apply to all women attending antenatal care, in delivery, postpartum or post abortion care, or who come for emergency care, and to all newborns at birth and during the first week of life (or later) for routine and emergency care. This guide is a guide for clinical decision-making. It facilitates the collection; analysis, classification and use of relevant information by suggesting key questions, essential observations and/or examinations, and recommending appropriate research-based interventions. It promotes the early detection of complications and the initiation of early and appropriate treatment, including time referral, if necessary. Correct use of this guide should help reduce high maternal and perinatal mortality and morbidity rates prevalent in many parts of the developing world, thereby making pregnancy and childbirth safer.

Kangaroo Mother Care - WHO 2003-04-17

Kangaroo mother care is a method of care of preterm infants which involves infants being carried, usually by the mother, with skin-to-skin contact. This guide is intended for health professionals responsible for the care of low-birth-weight and preterm infants. Designed to be adapted to local conditions, it provides guidance on how to organize services at the referral level and on what is needed to provide effective kangaroo mother care.

Managing Newborn Problems - WHO 2003-12-31

Every year throughout the world, about four million babies die before they reach one month old, most during the critical first week of life. Most of these deaths are a result of the poor health and nutritional status of the mother, combined with problems such as tetanus or asphyxia, trauma, low birth weight, or preterm birth. However, many of the conditions which result in perinatal death are preventable or treatable without the need for expensive technology. Against this background, this publication contains guidance on evidence-based standards for high quality care provision during the newborn period, considering the needs of mother and baby. It has been produced to assist countries with limited resources to reduce neonatal mortality. The information is arranged under four main headings: clinical assessment, findings and management; principles of newborn baby care; procedures; record keeping and essential equipment, supplies and drugs.

Newborn Care: 12 Questions Every First-Time Parent Asks - Grant Shunk 2020-09-07

The saying "babies don't come with a manual" may be true—but newborn books are a good place to start. Parenting is a process of phases and milestones, and newborn books are invaluable. Each new stage, as important as the last, serves as a building process for years of parental education and care. Newborn care will gently and sequentially lead you through each week of caring for a newborn in the first three months—the weeks and months that can be both exhilarating as well as nerve-racking. From how to prepare your home prior to baby's arrival, to both parents' contributions to the stages of early

development, this standout in newborn books prepares you for all of the challenging situations to come. This is not just a biological mother's physical prep; it's a trustworthy source of bottom-line, practical information as you navigate each new and exciting day. "Newborn care: 12 Questions Every First-Time Parent Asks" includes: +Do I really have to breastfeed for a whole year? +Do I need to sterilize bottles and pacifiers after every single use? +What constitutes "sleeping through the night," and will it ever happen? +My mother-in-law says I'll spoil my infant by holding him too much. True? +My child doesn't exactly sleep like a baby. He's constantly flailing. Is something wrong? +Is green poop normal? +Is it always bad to wake a sleeping baby? +How many layers of clothing does my infant need to go outside? +If I drink a glass of wine, do I have to "pump and dump"? +Why are infants supposed to wear a hat all the time? +My pediatrician told me to nurse my baby every three hours. Does that mean from the start of a feeding or the end? Because his sessions sometimes last an hour +Can a newborn truly have her days and nights mixed up? When it comes to newborn books, let Newborn care be your "manual" to successfully starting parenthood.

Maternal Newborn Nursing Care Plans - Carol J. Green 2014-12-09

Maternal Newborn Nursing Care Plans, Third Edition teaches students and practicing nurses how to assess, plan, provide, and evaluate care for pregnancy, delivery, recovery, abnormal conditions, and newborn care. Featuring more than 65 of the most common and high-risk care plans for nursing care using the nursing process approach, it includes NIC interventions, discussions on collaborative problems, key nursing activities, signs and symptoms, and diagnostic studies. Using a progressive approach, the text begins with generic care plans that address all patient situations regardless of the patient diagnosis or condition before moving on to more complicated and specific care plans.

Birth Settings in America - National Academies of Sciences, Engineering, and Medicine 2020-05-01

The delivery of high quality and equitable care for both mothers and newborns is complex and requires efforts across many sectors. The United States spends more on childbirth than any other country in the world, yet outcomes are worse than other high-resource countries, and even worse for Black and Native American women. There are a variety of factors that influence childbirth, including social determinants such as income, educational levels, access to care, financing, transportation, structural racism and geographic variability in birth settings. It is important to reevaluate the United States' approach to maternal and newborn care through the lens of these factors across multiple disciplines. Birth Settings in America: Outcomes, Quality, Access, and Choice reviews and evaluates maternal and newborn care in the United States, the epidemiology of social and clinical risks in pregnancy and childbirth, birth settings research, and access to and choice of birth settings.
