The Dramatic Portrait - Chris Knight 2017-07-13

Without light, there is no photograph. As almost every photographer knows, the word “photograph” has its roots in two Greek words that, together, mean “drawing with light.” But what is less commonly acknowledged and understood is the role that shadow plays in creating striking, expressive imagery, especially in portraiture. It is through deft, nuanced use of both light and shadow that you can move beyond shooting simply ordinary, competent headshots into the realm of creating dramatic portraiture that can so powerfully convey a subject’s inner essence, communicate a personal narrative, and express your photographic vision.

In *The Dramatic Portrait: The Art of Crafting Light and Shadow*, Chris Knight addresses portraiture with a unique approach to both light and shadow that allows you to improve and elevate your own portraiture. He begins with the history of portraiture, from the early work of Egyptians and Greeks to the sublime treatment of light and subject by artists such as Caravaggio, Rembrandt, and Vermeer. Chris then dives into a deep, hands-on exploration of light, shadow, and portraiture, offering numerous lessons and takeaways. He covers:

- The qualities of light: hard, soft, and the spectrum in between
- The relationships between light, subject, and background, and how to control them
- Lighting patterns such as Paramount, Rembrandt, loop, and split
- Lighting ratios and how they affect contrast in your image
- Equipment: from big and small modifiers to grids, snoots, barn doors,

flags, and gels

- Multiple setups for portrait shoots, including those that utilize one, two, and three lights
- How color contributes to drama and mood, eliciting an emotional response from the viewer
- How to approach styling your portrait, from wardrobe to background
- The post-processing workflow, including developing the RAW file, maximizing contrast, color grading, retouching, and dodging and burning for heightened drama and effect

Art Worlds, 25th Anniversary Edition - Howard S. Becker 2008-04-08

This classic sociological examination of art as collective action explores the cooperative network of suppliers, performers, dealers, critics, and consumers who—along with the artist—"produce" a work of art. Howard S. Becker looks at the conventions essential to this operation and, prospectively, at the extent to which art is shaped by this collective activity. The book is thoroughly illustrated and updated with a new dialogue between Becker and eminent French sociologist Alain Pessin about the extended social system in which art is created, and with a new preface in which the author talks about his own process in creating this influential work.

FACES: Photography and the Art of Portraiture - Paul Fuqua 2013-05-02

There is so much detail to be captured in a face. Cicero (106-43 BC) said: "The face is a picture of the mind as the eyes are its interpreter." To capture a person's personality, there are many things to keep in mind, and the authors of FACES show us how to match up a personality with lighting, posing, and composition. Portraiture is truly an art, and this book dives deep into the details so that you end up with a gorgeous portrait that both you and your subject love. Not only is this book the most comprehensive title available on portraiture, but it contains stunning images. Each image is paired with a lighting diagram, a description of why the type of image was chosen, and then takes you through postproduction to put the finishing touches on. The authors also showcase a gallery of portraits by renowned photographers.

The Essence of Photography - Bruce Barnbaum 2014-11-04

There is a lot more to photography than simply picking up a camera, pointing it toward something, and tripping the shutter. Achieving a great photograph requires thought and preparation, an understanding of the photographic process, and a firm grasp of how light and composition affect a photo. There must be personal involvement and personal expression. There must be experimentation, with the recognition that only a small percentage of experiments end successfully. In this book, best-selling author and world-renowned photographer and teacher Bruce Barnbaum explores these seldom-discussed issues by drawing upon his personal experiences and observations from more than 40 years of photographing and teaching. In addition to photographs, Bruce also uses painting, music, and writing, as well as the sciences and even business, to provide pertinent examples of creative thinking. These examples serve as stepping-stones that will lead you to your own heightened ability to see and be creative. Creativity is a topic that is almost wholly ignored in formal

education because most instructors think that it cannot be taught or learned. To the contrary, Bruce has proven that photographic seeing and creativity can be taught, learned, and improved. This book expands on the ideas that are central to Bruce's method of teaching photography, which he has used in workshops for the past 41 years. Included in the book are in-depth discussions on the following topics: Defining your own unique rhythm and approach as a photographer How to translate the scene in front of you to the final photograph The differences and similarities between how an amateur and a professional approach photography The differences between realism and abstraction, and the possibilities and limitations of each Learning to expand your own seeing and creativity through classes, workshops, and associating with other photographers Why the rules of composition should be ignored How to follow your passion When to listen to the critics and when to ignore them The book is richly illustrated with over 90 photographs taken by Bruce as well as other photographers. Seeing and creativity are difficult to teach, but not impossible. This very different, perhaps groundbreaking book is sure to inspire photographers of all skill levels-from beginners to seasoned professionals-to think deeply about the issues involved in creating successful photographs.

The Photographer's Guide to Posing - Lindsay Adler 2017-05-03

When photographing people, you can have a great composition, perfect light, and the right camera settings, but if your subject doesn't look right—if the pose

is off—the shot will not be a keeper. Posing is truly a crucial skill that photographers need to have in order to create great photographs. If you're looking to improve your ability to pose your subjects—whether they're men, women, couples, or groups—best-selling author and photographer Lindsay Adler's *The Photographer's Guide to Posing: Techniques to Flatter Everyone* is the perfect resource for you. In the first half of *The Photographer's Guide to Posing*, Lindsay discusses how the camera sees, and thus how camera angle, lens choice, and perspective all affect the appearance of your subject. Lindsay then covers things that ruin a pose—such as placement of the hands, and your subject's expression and posture. Next, Lindsay dives into “posing essentials,” outlining her approach to start with a “base pose,” then build on that to create endless posing opportunities. She also discusses posing the face—with specific sections dedicated to the chin, jaw, eyes, and forehead—as well as posing hands. In the second half of the book, Lindsay dedicates entire chapters to posing specific subject matter: women, men, couples, curvy women, families and small groups, and large groups. In each chapter, Lindsay addresses that subject matter's specific challenges, provides “go-to poses” you can always use, and covers how to train the eye to determine the best pose for your subject(s). Lindsay also teaches you how to analyze a pose so that you can create endless posing opportunities and continuously improve your work.

Art and Visual Perception - Rudolf Arnheim 1954

Painting Women - Patricia Phillippy 2020-03-03

This original analysis of the representation and self-representation of women in literature and visual arts revolves around multiple early modern senses of "painting": the creation of visual art in the form of paint on canvas and the use of cosmetics to paint women's bodies. Situating her study in sixteenth- and seventeenth-century Italy, France, and England, Patricia Phillippy brings together three distinct actors: women who paint themselves with cosmetics, women who paint on canvas, and women and men who paint women—either with pigment or with words. Phillippy asserts that early modern attitudes toward painting, cosmetics, and poetry emerge from and respond to a common cultural history. Materially, she connects those who created images of women with pigment to those who applied cosmetics to their own bodies through similar mediums, tools, techniques, and exposure to toxic materials. Discursively, she

illuminates historical and social issues such as gender and morality with the nexus of painting, painted women, and women painters. Teasing out the intricate relationships between these activities as carried out by women and their visual and literary representation by women and by men, Phillippy aims to reveal the delineation and transgression of women's creative roles, both artistic and biological. In *Painting Women*, Phillippy provides a cross-disciplinary study of women as objects and agents of painting.

Authentic Portraits - Chris Orwig

The most successful portraits take us well beyond the surface of how someone looks and show us the inner essence of who someone is. They reveal character, soul, and depth. They uncover hidden hopes and profound truths, revealing that authentic and deeply human light that shines within. And while technical expertise is undoubtedly important, it's not the light, camera, or pose that creates a great portrait. It's you, and it's the connection you create with the subject that makes all the difference. In *Authentic Portraits*, photographer Chris Orwig teaches you that the secret to creating meaningful portraits is simple: curiosity, empathy, kindness, and soul...plus a bit of technique. While Chris spends significant time on the fundamentals of "getting the shot"—working with natural light, nailing focus, dialing in the correct exposure, effectively posing and directing the subject, intentionally composing the frame—he also passionately discusses the need for personal development, creative collaboration, and connection with the subject. Because who you are directly and deeply affects what you create, and it is only through cultivating your own inner light that you will be able to bring it out in your subjects. Filled with instruction, insight, and inspiration, *Authentic Portraits* is an honest and personal book about creating better frames. It's also about becoming your best self. Take the journey, and you'll learn to find your vision and voice, bring intention to your photography and your life, embrace mystery, and understand the importance of gratitude and empathy. Along the way, you will teach the camera to see in a way that replicates how you feel, and you'll find you have all you need to create work of lasting significance.

The Artful Mind - Mark Turner 2006-10-26

All normal human beings alive in the last fifty thousand years appear to have possessed, in Mark Turner's phrase, "irrepressibly artful minds." Cognitively modern minds produced a staggering list of behavioral singularities--science, religion, mathematics, language, advanced tool use, decorative dress, dance, culture, art--that seems to indicate a mysterious and unexplained discontinuity between us and all other living things. This brute fact gives rise to some tantalizing questions: How did the artful mind emerge? What are the basic mental operations that make art possible for us now, and how do they operate? These are the questions that occupy the distinguished contributors to this volume, which emerged from a year-long Getty-funded research project hosted by the Center for Advanced Study in the Behavioral Sciences at Stanford. These scholars bring to bear a range of disciplinary and cross-disciplinary perspectives on the relationship between art (broadly conceived), the mind, and the brain. Together they hope to provide directions for a new field of research that can play a significant role in answering the great riddle of human singularity.

The Soul of the Camera - David duChemin 2017-06-14

As both an art form and a universal language, the photograph has an extraordinary ability to connect and communicate with others. But with over one trillion photos taken each year, why do so few of them truly connect? Why do so few of them grab our emotions or our imaginations? It is not because the images lack focus or proper exposure; with advances in technology, the camera does that so well these days. Photographer David duChemin believes the majority of our images fall short because they lack soul. And without soul, the images have no ability to resonate with others. They simply cannot connect with the viewer, or even—if we're being truthful—with ourselves.

authenticity. *The Soul of the Camera* is a personal and deeply pragmatic book that quietly yet forcefully challenges the idea that our cameras, lenses, and settings are anything more than dumb and mute tools. It is the photographer, not the camera, that can and must learn to make better photographs—photographs that convey our vision, connect with others, and, at their core, contain our humanity. *The Soul of the Camera* helps us do that.

Classical Painting Atelier - Juliette Aristides 2008-04-01

Want to paint more like Manet and less like Jackson Pollock? Students of art hailed *Classical Drawing Atelier*, Juliette Aristides's first book, as a dynamic return to the atelier educational model. Ateliers, popular in the nineteenth century, teach emerging artists by pairing them with a master artist over a period of years. The educational process begins as students copy masterworks, then gradually progress to painting as their skills develop. The many artists at every level who learned from *Classical Drawing Atelier* have been clamoring for more of this sophisticated approach to teaching and learning. In *Classical Painting Atelier*, Aristides, a leader in the atelier movement, takes students step-by-step through the finest works of Old Masters and today's most respected realist artists to reveal the principles of creating full-color realist still lifes, portraits, and figure paintings. Rich in tradition, yet practical for today's artists, *Classical Painting Atelier* is ideal for serious art students seeking a timeless visual education.

Art School - Steven Henry Madoff 2009-09-11

Leading international artists and art educators consider the challenges of art education in today's dramatically changed art world. The last explosive change in art education came nearly a century ago, when the German Bauhaus was formed. Today, dramatic changes in the art world—its increasing professionalization, the pervasive power of the art market, and fundamental shifts in art-making itself in our post-Duchampian era—combined with a revolution in information technology, raise fundamental questions about the education of today's artists. *Art School (Propositions for the 21st Century)* brings together more than thirty leading international artists and art educators to reconsider the practices of art education in academic, practical, ethical, and philosophical terms. The essays in the book range over continents, histories, traditions, experiments, and fantasies of education. Accompanying the essays are conversations with such prominent artist/educators as John Baldessari, Michael Craig-Martin, Hans Haacke, and Marina Abramovic, as well as questionnaire responses from a dozen important artists—among them Mike Kelley, Ann Hamilton, Guillermo Kuitca, and Shirin Neshat—about their own experiences as students. A fascinating analysis of the architecture of major historical art schools throughout the world looks

at the relationship of the principles of their designs to the principles of the pedagogy practiced within their halls. And throughout the volume, attention is paid to new initiatives and proposals about what an art school can and should be in the twenty-first century—and what it shouldn't be. No other book on the subject covers more of the questions concerning art education today or offers more insight into the pressures, challenges, risks, and opportunities for artists and art educators in the years ahead. Contributors Marina Abramovic, Dennis Adams, John Baldessari, Ute Meta Bauer, Daniel Birnbaum, Saskia Bos, Tania Bruguera, Luis Camnitzer, Michael Craig-Martin, Thierry de Duve, Clémentine Deliss, Charles Esche, Liam Gillick, Boris Groys, Hans Haacke, Ann Lauterbach, Ken Lum, Steven Henry Madoff, Brendan D. Design Thinking Research - Christoph Meinel

The practice of design thinking has become widespread over the last several years, and an increasing number of individuals and institutions have come to recognize its innovative power. However, its success story has also meant that the term has evolved into something of an overused, or even misused, buzzword. The demand for an in-depth, evidence-based understanding of the way design thinking works has grown accordingly. This challenge is addressed by the Hasso Plattner Design Thinking Research Program. Summarizing the outcomes of the research program's 12th year, this book presents a broad range of scientific insights gained by researchers at the Hasso Plattner Institutes in Potsdam, Germany and Stanford University in California, in the course of their investigations, experiments and studies. Special focus is placed on the impact, accessibility and measurability of design thinking. The contributing authors seek to establish common ground, conduct modelling, and develop essential toolkits. The expanding field of neurodesign is also addressed in contributions that explore the neural basis for creativity and nonverbal actions. The results of this rigorous academic research are not meant to be discussed exclusively within the scientific community: they will hopefully find their way to those who seek to promote innovation through collaboration, be it at businesses or in society.

The Simple Secret to Better Painting - Greg Albert 2003-04-23

Create art that's more attractive, interesting and eye-catching! Even if your perspective is accurate, your subject realistic and colors vibrant, a weak

composition - predictable, repetitious or monotonous - means a weak painting. The Simple Secret to Better Painting ensures that your compositions work every time. It's an insightful artistic philosophy that boils down the many technical principles of composition into a single master rule that's easy to remember and apply: Never make any two intervals the same. You can make every painting more interesting, dynamic and technically sound by varying intervals of distance, length and space, as well as intervals of value and color. The rule also applies to balance, shape and the location of your painting's focal point. Greg Albert illustrates these lessons with eye-opening examples from both beginning and professional artists, including Frank Webb, Tony Couch, Kevin Macpherson, Charles Reid, Tony Van Hasselt and more. You'll discover that the ONE RULE is the only rule of composition you need to immediately improve your work - the moment your brush touches the canvas.

Photography Composition and Design - Tavis Leaf Glover

A skyscraper can't be built without a proper foundation, just like a crunchy taco can't be built without a shell. The same goes with your art, whether it's street photography, fine art, cinematography, painting, or even sculpting. The techniques found in this book, though presented with street photos, will easily translate across every visual art and allow you to create remarkable, mouth-watering masterpieces. Countless artists out there want to push their art further, but they've run face first into a nasty plateau. Art is tough enough as it is, but without proper knowledge of composition and design it's easy to end up in a dark alley waiting to be maliciously fondled by mediocre art. Don't join the masses, join the elite! Learn serious composition and design techniques in a fun way that will launch you to the master level. You might even get a chuckle from the film photos capturing whacky tourists as they wonder aimlessly on the beautiful beach of Waikiki, Hawaii. Take part in the fun and seriously improve your art in a way that would make Da Vinci and Van Gogh smile with pride!

Invention in Rhetoric and Composition - Janice M. Lauer 2004

Invention in Rhetoric and Composition examines issues that have surrounded historical and contemporary theories and pedagogies of rhetorical invention, citing a wide array of positions on these issues in both primary rhetorical texts and secondary interpretations. It presents theoretical disagreements over the nature, purpose, and epistemology of invention and pedagogical debates over such issues as the relative importance of art, talent, imitation, and practice in teaching discourse. After a discussion of treatments of invention from the Sophists to the nineteenth century, *Invention in Rhetoric and Composition* introduces a range of early twentieth-century multidisciplinary theories and calls for invention's awakening in the field of English studies. It then showcases inventional theories and pedagogies that have emerged in the field of Rhetoric and Composition over the last four decades, including the ensuing research, critiques, and implementations of this inventional work. As a reference guide, the text offers a glossary of terms, an annotated bibliography of selected texts, and an extensive bibliography. Janice M. Lauer is Professor of English, Emerita at Purdue University, where she was the Reece McGee Distinguished Professor of English. In 1998, she received the College Composition and Communication Conference's Exemplar Award. Her publications

include *Four Worlds of Writing: Inquiry and Action in Context*, *Composition Research: Empirical Designs*, and *New Perspectives on Rhetorical Invention*, as well as essays on rhetorical invention, disciplinarity, writing as inquiry, composition pedagogy, historical rhetoric, and empirical research.

The Annotated Mona Lisa - Carol Strickland 2007-10

Like music, art is a universal language. Although looking at works of art is a pleasurable enough experience, to appreciate them fully requires certain skills and knowledge." --Carol Strickland, from the introduction to *The Annotated Mona Lisa: A Crash Course in Art History from Prehistoric to Post-Modern* * This heavily illustrated crash course in art history is revised and updated. This second edition of Carol Strickland's *The Annotated Mona Lisa: A Crash Course in Art History from Prehistoric to Post-Modern* offers an illustrated tutorial of prehistoric to post-modern art from cave paintings to video art installations to digital and Internet media. * Featuring succinct page-length essays, instructive sidebars, and more than 300 photographs, *The Annotated Mona Lisa: A Crash Course in Art History from Prehistoric to Post-Modern* takes art history out of the realm of dreary textbooks, demystifies jargon and theory, and makes art accessible-even at a cursory reading. * From Stonehenge to the Guggenheim and from Holbein to Warhol, more than 25,000 years of art is distilled into five sections covering a little more than 200 pages.
