Earth 2020: An Insider's Guide to a Rapidly Changing Planet - Philippe Tortell 2020-04-22

Fifty years have passed since the first Earth Day, on 22 April 1970. This accessible, incisive and timely collection of essays brings together a diverse set of expert voices to examine how the Earth's environment has changed over this past half century, and what lies in store for our planet over the coming fifty years. Earth 2020: An Insider's Guide to a Rapidly Changing Planet responds to a public increasingly

concerned about the deterioration of Earth's natural systems, offering readers a wealth of perspectives on our shared ecological past, and on the future trajectory of planet Earth. Written by world-leading thinkers on the front-lines of global change research and policy, this multi-disciplinary collection maintains a dual focus: some essays investigate specific facets of the physical Earth system, while others explore the social, legal and political dimensions shaping the human environmental footprint. In doing so, the essays collectively highlight the urgent need for collaboration across diverse domains of expertise in addressing one of the most significant challenges facing us today. Earth 2020 is essential reading for everyone seeking a deeper understanding of the past, present and future of our planet, and the role of humanity in shaping this trajectory.

Chasing Innovation - Lilly Irani 2019-03-12

A vivid look at how India has developed the idea of entrepreneurial citizens as leaders mobilizing society and how people try to live that promise Can entrepreneurs develop a nation, serve the poor, and pursue creative freedom, all while generating economic value? In Chasing Innovation, Lilly Irani shows the contradictions that arise as designers, engineers, and businesspeople frame development and governance as opportunities to innovate. Irani documents the rise of "entrepreneurial citizenship" in India over the past seventy years, demonstrating how a global ethos of development through design has come to shape state policy, economic investment, and the middle class in one of the world's fastest-growing nations. Drawing on her own professional experience as a Silicon Valley designer and nearly a decade of fieldwork following a Delhi design studio, Irani vividly chronicles the practices and mindsets that hold up professional design as the answer to the challenges of a country of more than one billion people, most of whom are poor. While discussions of entrepreneurial citizenship promise that Indian children can grow up to lead a nation aspiring to uplift the poor, in reality, social, economic, and political structures constrain whose enterprise, which hopes, and which needs can be seen as worthy of investment. In the process, Irani warns, powerful investors, philanthropies, and companies exploit citizens' social relations, empathy, and political hope in the quest to generate economic value. Irani argues that the move to recast social change as innovation, with innovators as heroes, frames others—craftspeople, workers, and activists—as of lower value, or even dangers to entrepreneurial forms of development. With meticulous historical context and compelling stories, Chasing Innovation lays bare how long-standing power hierarchies such as class, caste, language, and colonialism continue to shape opportunity in a world where good ideas supposedly

rule all.

Promoting the Health of the Community - Julie Ann St. John 2021-03-22

Community health workers (CHWs) are an increasingly important member of the healthcare and public health professions who help build primary care capacity. Yet, in spite of the exponential growth of CHW interventions, CHW training programs, and CHW certification and credentialing by state agencies, a gap persists in the literature regarding current CHW roles and skills, scope of practice, CHW job settings, and national standards. This collection of contributions addresses this gap by providing information, in a single volume, about CHWs, the roles CHWs play as change agents in their communities, integration of CHWs into healthcare teams, and support and recognition of the CHW profession. The book supports the CHW definition as defined by the American Public Health Association (APHA), Community Health Worker Section (2013), which states, “A community health worker is a frontline public health worker who is a trusted member of and/or has an unusually close understanding of the community served.” The scope of the text follows the framework of the nationally recognized roles of CHWs that came out of a national consensus-building project called “The Community Health Worker (CHW) Core Consensus (C3) Project”. Topics explored among the chapters include: Cultural Mediation Among Individuals, Communities, and Health and Social Service Systems Care Coordination, Case Management, and System Navigation Advocating for Individuals and Communities Building Individual and Community Capacity Implementing Individual and Community Assessments Participating in Evaluation and Research Uniting the Workforce: Building Capacity for a National Association of Community Health Workers Promoting the Health of the Community is a must-have resource for CHWs, those interested in CHW scope of practice and/or certification/credentialing, anyone interested in becoming a CHW, policy-makers, CHW payer systems, CHW supervisors, CHW employers, CHW instructors/trainers, CHW advocates/supporters, and communities served by CHWs.

Ecopolis - Paul F. Downton 2008-11-19

From 2008, for the first time in human history, half of the world's population now live in cities. Yet despite a wealth of literature on green architecture and planning, there is to date no single book which draws together theory from the full range of disciplines - from architecture, planning and ecology - which we must come to grips with if we are to design future cities which are genuinely sustainable. Paul Downton's Ecopolis takes a major step along this path. It highlights the urgent need to understand the role of cities as both agents of change and means of survival, at a time when climate change has finally grabbed world attention, and it provides a framework for designing cities that integrates knowledge - both academic and practical - from a range of relevant disciplines. Identifying key theorists, practitioners, places and philosophies, the book provides a solid theoretical context which introduces the concept of urban fractals, and goes on to present a series of design and planning tools for achieving Sustainable Human Ecological Development (SHED). Combining knowledge from diverse fields to present a synthesis of urban ecology, the book will provide a valuable resource for students, researchers and practitioners in architecture, construction, planning, geography and the traditional life sciences.

New York for Sale - Tom Angotti 2011-02-25

How community-based planning has challenged the powerful real estate industry in New York City. Remarkably, grassroots-based community planning flourishes in New York City—the self-proclaimed “real estate capital of the world”—with at least seventy community plans for different neighborhoods throughout the city. Most of these were developed during fierce struggles against gentrification, displacement, and environmental hazards, and most got little or no support from government. In fact, community-based plans in New York far outnumber the land use plans produced by government agencies. In *New York for Sale*, Tom Angotti tells some of the stories of community planning in New York City: how activists moved beyond simple protests and began to formulate community plans to protect neighborhoods against urban renewal, real estate mega-projects, gentrification, and environmental hazards. Angotti, both observer of

and longtime participant in New York community planning, focuses on the close relationships among community planning, political strategy, and control over land. After describing the political economy of New York City real estate, its close ties to global financial capital, and the roots of community planning in social movements and community organizing, Angotti turns to specifics. He tells of two pioneering plans forged in reaction to urban renewal plans (including the first community plan in the city, the 1961 Cooper Square Alternate Plan—a response to a Robert Moses urban renewal scheme); struggles for environmental justice, including battles over incinerators, sludge, and garbage; plans officially adopted by the city; and plans dominated by powerful real estate interests. Finally, Angotti proposes strategies for progressive, inclusive community planning not only for New York City but for anywhere that neighborhoods want to protect themselves and their land. *New York for Sale* teaches the empowering lesson that community plans can challenge market-driven development even in global cities with powerful real estate industries

Human Security in World Affairs - Alexander K. Lautensach 2013-01

This book is intended as an introductory text from senior undergraduate level up, to be used in courses on international studies and relations, political studies, history, human geography, anthropology and human ecology, futures studies, applied social studies, public health, and other fields. It represents in a coherent fashion the new subject of human security and sets it apart from more traditional models of security. Its approach is deliberately multidisciplinary and transcultural. In addition to a thorough overview of the human security concept, the chapters address problems and opportunities in international law, politics, international relations, human ecology, ethics, law enforcement, development aid, human rights, and public health. The reader is also introduced to specific human security regimes that address human rights violations, peace building and conflict resolution, as well as global environmental governance. The book encourages a vision of the future that acknowledges the certainty of change, extrapolates significant current trends, and questions the values, beliefs and ideals that tend to inform dominant notions of development. Because of its transdisciplinary approach, the book will appeal to a very wide range of interests at the post-secondary/tertiary level. It will be of particular interest to college and university undergraduate students as well as graduate students and researchers, and also to educators from various disciplines in the natural sciences, social sciences, and humanities.

Animacies - Mel Y. Chen 2012-07-10

Rethinks the criteria governing agency and receptivity, health and toxicity, productivity and stillness

Media Innovations - Tanja Storsul 2013

The various chapters of the book present selected studies that together illustrate how a more explicit focus on innovation and innovation theory can provide new insights into and generate knowledge about how media innovations develop, the sociocultural conditions of such innovations, the role of technology, and power relations in media developments. [Contains: Piet Bakker, 'Measuring Innovation : Successes and Failures in a Newspaper Market'. (Ch. 10).].

The Future of Sustainability - Marco Keiner 2006-09-09

This book presents a broad discussion on sustainable development, rethinking and improving its effectiveness as a paradigm of today and tomorrow. Outstanding visionary thinkers and scientists offer their timely assessment on the future prospects of mankind: In what direction are we heading? How can the world become more just and equitable, and how can future development be sustained to adequately address economic, social, and – perhaps most important – environmental issues?

Essential Methods for Planning Practitioners - Laxmi Ramasubramanian 2017-11-17

This book assembles and organizes a selected range of methods and techniques that every planning practitioner should know to be successful in the contemporary global urban landscape. The book is unique because it links different aspects of the planning/policy-making enterprise with the appropriate methods and approaches, thus contextualizing the use of specific methods and techniques within a sociopolitical and ethical framework. This volume familiarizes readers with the diverse range of methods, techniques, and skills that must be applied at different scales in dynamic workplace environments where planning policies and programs are developed and implemented. This book is an invaluable resource in helping new entrants to the planning discourse and profession set aside their own disciplinary biases and empowering them to use their expert knowledge to address societal concerns.

Visual Teams - David Sibbet 2011-09-23

Graphic tools and visual solutions for team building and development Visual Teams uses visual tools and methods to help teams—both face-to-face and virtual—reach high performance in today's work environment. As teams become more and more global and distributed, visualization provides an important channel of communication—one that opens up the group's mind to improving work systems and processes by understanding relationships, interconnections, and big picture contexts. Visual Teams shares best practices and uses visualization as a power tool for process improvement by providing teams with a common

language for high performance. The book: Explores how any kind of team can draw on the principles and practices of creative design teams in the software, architectural, engineering, and information design professions Introduces the Drexler/Sibbet Team Performance™ Model and related tools—a system used throughout companies such as Nike, Genentech, Becton Dickinson, Chevron, and others Visual Teams presents a comprehensive framework, best practices, and unique visual tools for becoming an innovative, high-performance team.

Free, Fair, and Alive - David Bollier 2019-09-03

The power of the commons as a free, fair system of provisioning and governance beyond capitalism, socialism, and other -isms. From co-housing and agroecology to fisheries and open-source everything, people around the world are increasingly turning to 'commoning' to emancipate themselves from a predatory market-state system. Free, Fair, and Alive presents a foundational re-thinking of the commons — the self-organized social system that humans have used for millennia to meet their needs. It offers a compelling vision of a future beyond the dead-end binary of capitalism versus socialism that has almost brought the world to its knees. Written by two leading commons activists of our time, this guide is a penetrating cultural critique, table-pounding political treatise, and practical playbook. Highly readable and full of colorful stories, coverage includes: Internal dynamics of commoning How the commons worldview opens up new possibilities for change Role of language in reorienting our perceptions and political strategies Seeing the potential of commoning everywhere. Free, Fair, and Alive provides a fresh, non-academic synthesis of contemporary commons written for a popular, activist-minded audience. It presents a compelling narrative: that we can be free and creative people, govern ourselves through fair and accountable institutions, and experience the aliveness of authentic human presence.

Coding Freedom - E. Gabriella Coleman 2013

Who are computer hackers? What is free software? And what does the emergence of a community dedicated to the production of free and open source software--and to hacking as a technical, aesthetic, and moral project--reveal about the values of contemporary liberalism? Exploring the rise and political significance of the free and open source software (F/OSS) movement in the United States and Europe, Coding Freedom details the ethics behind hackers' devotion to F/OSS, the social codes that guide its production, and the political struggles through which hackers question the scope and direction of copyright and patent law. In telling the story of the F/OSS movement, the book unfolds a broader narrative involving

computing, the politics of access, and intellectual property. E. Gabriella Coleman tracks the ways in which hackers collaborate and examines passionate manifestos, hacker humor, free software project governance, and festive hacker conferences. Looking at the ways that hackers sustain their productive freedom, Coleman shows that these activists, driven by a commitment to their work, reformulate key ideals including free speech, transparency, and meritocracy, and refuse restrictive intellectual protections. Coleman demonstrates how hacking, so often marginalized or misunderstood, sheds light on the continuing relevance of liberalism in online collaboration.

The Public Domain - James Boyle 2009-09-01

In this enlightening book James Boyle describes what he calls the range wars of the information age--today's heated battles over intellectual property. Boyle argues that just as every informed citizen needs to know at least something about the environment or civil rights, every citizen should also understand intellectual property law. Why? Because intellectual property rights mark out the ground rules of the information society, and today's policies are unbalanced, unsupported by evidence, and often detrimental to cultural access, free speech, digital creativity, and scientific innovation. Boyle identifies as a major problem the widespread failure to understand the importance of the public domain--the realm of material that everyone is free to use and share without permission or fee. The public domain is as vital to innovation and culture as the realm of material protected by intellectual property rights, he asserts, and he calls for a movement akin to the environmental movement to preserve it. With a clear analysis of issues ranging from Jefferson's philosophy of innovation to musical sampling, synthetic biology and Internet file sharing, this timely book brings a positive new perspective to important cultural and legal debates. If we continue to enclose the "commons of the mind," Boyle argues, we will all be the poorer.

Insourcing Innovation - David Silverstein 2007-12-17

Innovation is central to business success, yet no other aspect of business is as frustrating and out of control. Instead of occurring in fits and starts and strokes of genius, innovation needs to become an all-the-time event that's measurable, reliable, predictable, streamlined, and effective. Asserting that every innovation objective has a finite set of possible solutions given its unique constraints, TRIZ, the Theory of Inventive Problem Solving, is a structured system for making innovation more manageable and profitable. Divided into five parts, *Insourcing Innovation: How to Achieve Competitive Excellence Using TRIZ* demonstrates how the application of a consistent, systematic approach will render innovative problem

solving a dependable reality rather than an enigmatic phenomenon. Part I provides a framework for thinking about business excellence and the case for why TRIZ is a world-class approach for achieving perpetual innovation with existing resources. Part II covers the tactical aspects of TRIZ, with a central focus on the TRIZ methodology (DMASI) and its primary constructs, techniques, and components. Part III provides implementation case examples, including an in-depth breakdown of how TRIZ was used to create a self-heating beverage container. This part also summarizes how TRIZ was applied to innovate parts of the International Space Station, the Cassini Saturn orbiter, and even hospital triage. Part IV transitions from the tactical aspects of TRIZ to its strategic aspects, which show you that no single innovation stands alone. All tap into one or more of eight evolutionary forces to become what they are. This part describes these forces with related examples. Part V discusses how structured innovation is part of the larger system of “total performance excellence.” Highlighting their interdependence, it shows how key aspects of business excellence enable structured innovation, and at the same time are enabled by structured innovation.

Great Demo! - Peter E. Cohan 2005-03

Have you ever seen a bad software demo ? Peter Cohan helps organizations put the Wow! into their demos to make them crisp, compelling and successful - to get the job done. He has had roles in four corners: technical, product and field marketing (he was banished to Basel, Switzerland for two years for bad behavior); sales and sales management; senior management (he built a business unit up from an empty spreadsheet into a \$30M per year operation); and, in this last role, he has been that most important of all possible entities, a customer Peter Cohan leverages twenty-five years of experience in selling and marketing business software and as a customer. The Great Demo! method comes directly from extensive firsthand experiences in developing and delivering software demonstrations, and in coaching others to achieve surprisingly high success rates with their sales and marketing demos. For more information on demonstration methods, guidelines and tips, explore the author's website at www.SecondDerivative.com or contact the author directly at PCohan@SecondDerivative.com.

Ancient Maya Commerce - Scott R. Hutson 2017-03-01

Ancient Maya Commerce presents nearly two decades of multidisciplinary research at Chunchucmil, Yucatan, Mexico—a thriving Classic period Maya center organized around commercial exchange rather than agriculture. An urban center without a king and unable to sustain agrarian independence,

Chunchucmil is a rare example of a Maya city in which economics, not political rituals, served as the engine of growth. Trade was the *raison d'être* of the city itself. Using a variety of evidence—archaeological, botanical, geomorphological, and soil-based—contributors show how the city was a major center for both short- and long-distance trade, integrating the Guatemalan highlands, the Gulf of Mexico, and the interior of the northern Maya lowlands. By placing Chunchucmil into the broader context of emerging research at other Maya cities, the book reorients the understanding of ancient Maya economies. The book is accompanied by a highly detailed digital map that reveals the dense population of the city and the hundreds of streets its inhabitants constructed to make the city navigable, shifting the knowledge of urbanism among the ancient Maya. *Ancient Maya Commerce* is a pioneering, thoroughly documented case study of a premodern market center and makes a strong case for the importance of early market economies in the Maya region. It will be a valuable addition to the literature for Mayanists, Mesoamericanists, economic anthropologists, and environmental archaeologists. Contributors: Anthony P. Andrews, Traci Ardren, Sheryl Luzzadder-Beach, Timothy Beach, Chelsea Blackmore, Tara Bond-Freeman, Bruce H. Visual Tools for Developing Cross-Disciplinary Collaboration, Innovation and Entrepreneurship Capacity - Selena Griffith 2018

"Visual Tools for Developing Cross-Disciplinary Collaboration, Innovation and Entrepreneurship Capacity will identify and document pedagogical and practice-based visual approaches to scaffold and develop capacity for cross-disciplinary collaboration, innovation and entrepreneurship. An introductory chapter will introduce and contextualise the key themes of the book. It outlines the value in supporting acquisition of cross-disciplinary collaboration, innovation and entrepreneurship skills in students and why visual tools are particularly useful in doing this. The main body of the book will be divided into four sections, each will include theory and case study based inquiries. - Visual Tools for Collaboration This first section would explore approaches to developing skills for cross-disciplinary collaboration in students leveraging visual tools and artefacts. - Visual tools for Innovation This second section would explore approaches to scaffolding the acquisition of innovation skills in students via use of visual tools and artefacts. - Visual tools for Entrepreneurship This third section would explore how students can be supported and encouraged to attain appropriate skills and knowledge for successful entrepreneurship through the use of

visual tools and artefacts. - Integrated Approaches This fourth, and final, section will demonstrate integrated approaches with respect two or three of these. The chapter authors have been selected from across disciplinary specialisations from a global pool of educators and practitioners in order to provide a broad range of perspectives. A final summary chapter summaries and reflects on the key insights of the book"--

No More Excuses - Sam Silverstein 2015-01-20

Accountability is not a way of doing. Accountability is a way of thinking. Those who achieve greatness know true accountability makes all the difference between success and failure. Based on extensive interviews with accountable leaders—from Fortune 500 CEOs to Hall of Fame athletes—No More Excuses identifies the five accountabilities of successful people and organizations. These tenets encourage accountability in others and performance at the highest level. When you willingly accept and embrace the five accountabilities, you encourage accountability in others and empower your teams to achieve at the highest level. The result is an organization focused on its fundamental values and committed, at the individual level, to achieving critical strategic goals. Whether you are a business owner, a top executive, or a team leader, accountability starts with you and trickles down to everyone else. If you want to build an organization that achieves its goals and beats the competition it is time for No More Excuses.

Combating Antimicrobial Resistance - National Academies of Sciences, Engineering, and Medicine
2018-01-08

As of 2017, the emergence and spread of antimicrobial resistance continues unabated around the world, leaving devastating health and economic outcomes in its wake. Those consequences will multiply if collaborative global action is not taken to address the spread of resistance. Major drivers of antimicrobial resistance in humans have been accelerated by inappropriate antimicrobial prescribing in health care practices; the inappropriate use of antimicrobials in livestock; and the promulgation of antibiotic resistance genes in the environment. To explore the issue of antimicrobial resistance, the Forum of Microbial Threats planned a public workshop. Participants explored issues of antimicrobial resistance through the lens of One Health, which is a collaborative approach of multiple disciplines - working locally, nationally, and globally - for strengthening systems to counter infectious diseases and related issues that threaten human, animal, and environmental health, with an end point of improving global health and achieving gains in development. They also discussed immediate and short-term actions and research needs that will

have the greatest effect on reducing antimicrobial resistance, while taking into account the complexities of bridging different sectors and disciplines to address this global threat. This publication summarizes the presentations and discussions from the workshop.

Innovation and Entrepreneurship - Charles H. Matthews 2015-03-12

This book presents a new model, the competency framework, for students, innovators, entrepreneurs, managers, and anyone who wants to better understand the dynamic world of innovation and entrepreneurship. Focused on both the individual and strategic organizational level, this book is about people and the competencies each person needs to learn to be successful in creating a more dynamic future. Matthews and Brueggemann's framework for innovation and entrepreneurship competencies empowers individuals to excel at innovation and new venture creation. It provides a practical guide and clear and concise understanding of the knowledge, skills, attitudes, and experiences that are needed to increase imagination, creativity, innovation and new venture creation capability. *Innovation and Entrepreneurship* will be attractive for students of entrepreneurship, innovation, management and cross-disciplinary classes, such as design thinking. Presented in a modular format, *Innovation & Entrepreneurship* informs the future direction of people and technology, as well as the educational systems producing the next generation of innovators and entrepreneurs. Based on extensive academic research, this book is organized into two sections: Twelve innovation elements and twelve competency categories. The elements are the foundation and the competency categories are the building blocks that inform our path toward a more precise understanding of how innovation and entrepreneurship plays an important role in economic development and our daily lives.

Innovation and Entrepreneurship will be attractive for students of entrepreneurship, innovation, management and cross-disciplinary classes, such as design thinking. Presented in a modular format, Innovation & Entrepreneurship informs the future direction of people and technology, as well as the educational systems producing the next generation of innovators and entrepreneurs. Based on extensive academic research, this book is organized into two sections: Twelve innovation elements and twelve competency categories. The elements are the foundation and the competency categories are the building blocks that inform our path toward a more precise understanding of how innovation and entrepreneurship plays an important role in economic development and our daily lives.

The Innovator's Toolkit - David Silverstein 2009

An innovation guide for business leaders, managers, and new product developers. The Innovator's Toolkit explains all the fundamental tools and concepts anyone involved in innovation should be familiar with--especially methods and strategies for improving products and services and developing new ones. This book is written in an easy-to-use reference format that helps readers understand why, when, and how to apply each tool. The tools and techniques in this book are organized around a four-step innovation methodology--define, discover, develop, and demonstrate--that takes readers through problem identification, then flows into idea generation, idea selection, and, finally, idea implementation. Constant innovation is a necessity for business success today; The Innovator's Toolkit presents an effective plan for achieving it.
