Intensive vs. Extensive Approaches in Foreign Language Teaching - Carmen Neagu 2023-01-22

The purpose of this theoretical and experimental paper is to clarify the influence of an extensive learning program on high school students' language comprehension and attitude towards reading. The experiment was administered throughout a school semester with a control group following the intensive approach and an experimental group subject to the extensive approach. The intervention of the experiment was represented by the two teaching approaches (extensive vs. intensive), whereas the measured outcome consisted in the learners' changes in language proficiency and attitude towards reading. Since both intensive and extensive approaches are necessary in order to prepare students for college tasks, the senior high school period is an ideal moment to start introducing extensive language programs as a means of achieving and not substituting the communicative competence. Furthermore, the reading habit will outlast and accompany students as a lifelong second nature.

Emerging Trends in Technology for Education in an Uncertain World - Dwi Nanto 2021-12-27

Presently, people are facing a condition called VUCA (Volatility, Uncertainty, Complexity, and Ambiguity) where this condition is described as a turbulent, uncertain, complicated, unclear condition. The world of work and industry is changing quickly, driven by the development of technology, information and

communication. Advances in computer technology, artificial, intelligence, robotics which is also called as the industrial revolution 4.0 eras, are of significant influence on environment and people. A time where humans must learn quickly, and an era where the future is unpredictable, where choices for various conditions are increasing and mindsets are changing. The big challenge for educational institutions, especially Islamic educational institutions today, is how to prepare young people on various aspects of cognitive, mental, and spiritual preparedness to face the changing environment. Development in the real world is far more complex than what is learned in the classroom, so it is necessary to educate and transform curriculum that is directed in accordance with the demands of present times. The 6th International Conference on emerging trends in technology for education in facing VUCA (Volatility, Uncertainty, Complexity, and Ambiguity) is designed not only to share research, but also to offer recommendations to governments, educational institutions and other stakeholders to improve the quality of education through technology-based educational programs. The conference was held by Faculty of Education UIN Syarif Hidayatullah Jakarta. Scholars, researchers, policy makers, teachers, and students from various countries participated and worked together to discuss how to improve the quality of education in the Muslim community. Guided by UIN Jakarta, the 6th ICEMS of 2020 provided opportunities for various educational stakeholders especially in Muslim Communities around the world to share their creative and innovative works, opinions, and experiences in open academic forums.

The Roles of Language in CLIL - Ana Llinares 2012-03-15

An examination of how language functions in CLIL, based on a corpus of classroom interactions. Drawing on their wide experience as CLIL educators and researchers, the authors explore data collected in real CLIL classrooms from two interrelated perspectives: the CLIL classroom as an interactional context for developing language and content, and the genres and registers through which the meanings of the different academic subjects are enacted. From the analysis of this corpus of data, the authors provide a rich description of how CLIL students' language works and may be expected to develop. Also available separately as a hardback.

Grade Seven Music Theory - Victoria Williams 2016-09-28

Grade Seven Music Theory for ABRSM Candidates A complete course for students taking the ABRSM Grade 7 music theory exam. This book takes you through each topic with a step-by-step approach. The topic in each unit is explained in simple terms with several musical examples, and is then followed by a page of consolidation exercises so that you can immediately practice your new-found knowledge. Model answers are provided. The course covers the ABRSM syllabus for Grade Seven, which is a pre-advanced level. The course is broken down into four sections, which mirror the way the exam paper is organised - figured bass, harmonic reconstruction, composition and score-based analysis questions. In the figured bass section, you will build on the basic figured bass knowledge you gained at grade 6. You will extend your "harmonic vocabulary" to include chords with an added 7th (e.g. V7 or II7), with an added 9th (e.g. V9) and also learn about how dissonant suspensions are handled in figured bass four-part harmony,

and how modulation works in figured bass. This section will also teach you specifically how to answer question 1 in the ABRSM grade 7 exam paper, which asks you to supply the figured bass to a given bass and melody line. In the harmonic reconstruction question, you are asked to expand a given "skeleton framework" into a musical-sounding keyboard piece (in 4-part harmony) by adding recognised melodic decoration in an appropriate way. You will learn about the various types of non-chord notes, such as passing notes, appoggiaturas (accented passing notes), auxiliary notes, suspensions, anticipations and retardations. You will also learn how a melody can be decorated with additional chord notes, such as harmonic auxiliary notes. This section teaches you a step-by-step method for tackling question 2 in the grade 7 exam. The third section in the course covers composition. At grade 7, you may be asked to compose a melody line which fits a given piano accompaniment - you'll learn how to fit a melody on top of another one. An alternative question is to compose a melody to a given chord progression, so this section will also teach you how to tackle this second type of question, and how to achieve top marks, whichever question you choose. Last but not least (because it's worth 50% of the whole exam!) we cover the score analysis question. You will learn a wide range of interpretive skills, including transposition into or out of concert pitch, harmonic analysis, notation knowledge, awareness of stylistic eras and much more. Perfect for self-study, or to use with your music teacher. Ample musical illustrations and exercises are included, with model answers provided. Each page has been carefully designed to be suitable for photocopying. This book is "bilingual", and contains both UK and USA musical terminology.
