Zumberge's Laboratory Manual for Physical Geology - Robert Rutherford 2010-11-16

Zumberge's Laboratory Manual for Physical Geology, 15e is written for the freshman-level laboratory course in physical geology. In this lab, students study Earth materials, geologic interpretation of topographic maps, aerial photographs and Earth satellite imagery, structural geology and plate tectonics and related phenomena. With over 30 exercises, professors have great flexibility when developing the syllabus for their physical geology lab course. The ease of use, tremendous selection, and tried and true nature of the labs selected have made this lab manual one of the leading selling physical geology lab manuals.

Libraries, Immigrants, and the American Experience - Plummer Alston Jones 1999

This is the first full-length, national scope treatment of American public library service to immigrants, which was a central and continuing mission from 1876, when the American Library Association (ALA) was founded, through 1948, when the ALA Committee on Work with the Foreign Born (ALA CWFB) disbanded. It focuses on the leaders of the movement who provided immigrants with information, personal attention, and the guidance they needed to adjust, survive, and thrive.

A Rose for Mrs. Miniver - Michael Troyan 1999-01-01

" In this first-ever biography of Greer Garson, Michael Troyan sweeps away the many myths that even today veil her life. The true origins of her birth, her fairy-tale discovery in Hollywood, and her career struggles at Metro-Goldwyn-Mayer are revealed for the first time. Garson combined an everywoman quality with grace, charm, and refinement. She won the Academy Award in 1941 for her role in Mrs. Miniver , and for the next decade she reigned as the queen of MGM. Co-star Christopher Plummer

remembered, ""Here was a siren who had depth, strength, dignity, and humor who could inspire great trust, suggest deep intellect and whose misty languorous eyes melted your heart away!"" Garson earned a total of seven Academy Award nominations for Best Actress, and fourteen of her films premiered at Radio City Music Hall, playing for a total of eighty-four weeks--a record never equaled by any other actress. She was a central figure in the golden age of the studios, working with legendary performers Clark Gable, Marlon Brando, Elizabeth Taylor, Errol Flynn, Joan Crawford, Robert Mitchum, Debbie Reynolds, and Walter Pidgeon. Garson's experiences offer a fascinating glimpse at the studio system in the years when stars were closely linked to a particular studio and moguls such as L.B. Mayer broke or made careers. With the benefit of exclusive access to studio production files, personal letters and diaries, and the cooperation of her family, Troyan explores the triumphs and tragedies of her personal life, a story more colorful than any role she played on screen.

Memorial Tributes - National Academy of Engineering 2007-06-24

This is the 11th Volume in the series Memorial Tributes compiled by the National Academy of Engineering as a personal remembrance of the lives and outstanding achievements of its members and foreign associates. These volumes are intended to stand as an enduring record of the many contributions of engineers and engineering to the benefit of humankind. In most cases, the authors of the tributes are contemporaries or colleagues who had personal knowledge of the interests and the engineering accomplishments of the deceased. Through its members and foreign associates, the Academy carries out the responsibilities for which it was established in 1964. Under the charter of the National Academy of Sciences, the National Academy of Engineering was formed as a parallel organization of outstanding engineers. Members are elected on the basis of significant contributions to engineering theory and practice and to the literature of engineering or on the basis of demonstrated unusual accomplishments in the pioneering of new and developing fields of technology. The National Academies share a responsibility to advise the federal government on matters of science and technology. The expertise and credibility that the National Academy of Engineering brings to that task stem directly from the abilities, interests, and achievements of our members and foreign associates, our colleagues and friends, whose special gifts we remember in this book.

The Book of the Damned - Charles Fort 2014-01-09

Features an introductory essay by Jack Womack! Welcome to the worlds of Charles Fort, chronicler of the odd, the weird, the strange, the unexpected, and the inexplicable. In words at times as beautiful as anything ever written in English, Fort reveals the marvels of an age, questions the nature of what we think we know for certain, and provides the reader with leads on how not to be fooled by shaggy dog stories. Here you'll find rains of the unexpected, fish, snakes, and other items from the _super-Sargasso sea of the unexplained that circles the Earth. Here are accounts of UFOs, accounts of odd animals seen at sea or on land, mysterious attacks by what appear to have been animals, mysterious appearances of things and people in places they could not be. Here Fort's epic account of spontaneous combustion, lights in the sky, poltergeists, unseen. murderous wild animals, mysterious disappearances, manifestations of psychotic mania, speaking in tongues^{3/4}and, of course, the cow that gave birth to two lambs. All of this Fortean wonder is prefaced by a magnificent new introductory essay by Jack Womack, winner of the Philip K. Dick Award and lifetime Fortean. This Ebook is part of the Baen Books Charles Fort Ebook Collection At the publisher's request, this title is sold without DRM (Digital Rights Management).

A Princeton Companion - Alexander Leitch 2015-03-08

In this unusual and unique volume, Alexander Leitch provides a warm, often witty, and always informative reference book on Princeton University. The collection of approximately 400 articles, alphabetically arranged and written by some seventy faculty members and alumni in addition to the author, covers all aspects of Princeton life in the past as well as in the present. Of special interest are the biographies of eminent Princetonians, including the University's presidents, well-known trustees, distinguished deans, famous alumni, and some of Princeton's most prominent and popular professors. Other articles in the book embrace a wide range of topics: histories of academic departments, programs, and research units; descriptions of the honor system, the preceptorial method, the four-course plan, and coeducation; a historical survey of the University's acquisition of land and the development of its campus, together with articles on its principal buildings; pieces on student activities; accounts of alumni activities; articles on athletics; portraits of notable personalities; and commentaries on a host of lighter topics such as the cane spree, beer jackets, the Faculty Song, the proctors, and Veterans of Future Wars. Among the most important articles are one summarizing Woodrow Wilson's Sesquicentennial address, "Princeton in the Nation's Service," and a dozen others recording faculty and alumni achievements toward the goal encompassed by that phrase. Originally published in 1978. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.
