ECON Micro - William McEachern 2015-05-11

The first Canadian edition of ECON Macro is an innovative, hybrid-learning package that was created by the continuous feedback of our “student-tested, faculty-approved” process, unique to our 4ltr Press series. ECON Macro delivers comprehensive content in a visually appealing, succinct print component paired with a high-value online offering - MindTap - that includes an integrated eReader and a set of interactive digital tools that appeal to a wide range of learning styles and needs, all at a value-based price. This winning combination is proven to increase engagement and lead to better outcomes. The hallmark of this solution is the student-friendly approach taken by award-winning instructor and author Will McEachern. McEachern uses familiar examples and illustrations drawn from students’ daily lives to vividly demonstrate that when students show up for class the first day, they each come with at least 17 years of first-hand experience in making economic choices and dealing with economic institutions and events, connecting these life experiences to key macroeconomic concepts.

Principles of Macroeconomics - N. Gregory Mankiw 2012-12-19

PRINCIPLES OF MACROECONOMICS, Sixth Edition, became a best seller after its introduction and continues to be the most popular and widely used text in the economics classroom. Instructors found it the perfect complement to their teaching. A text by a superb writer and economist that stressed the most important concepts without overwhelming students with an excess of detail was a formula that was quickly imitated, but has yet to be matched. The sixth edition features a strong revision of content in all twenty-three chapters. Dozens of new applications emphasize the real-world relevance of economics for today's students through interesting news articles, realistic case studies, and engaging problems. The premier ancillary package is the most extensive in the industry, using a team of instructors/preparers that have been with the project since the first edition. The text material is again fully integrated into Aplia, the best-selling online homework solution. I have tried to put myself in the position of someone seeing economics for the first time. My goal is to emphasize the material that students should and do find interesting about the study of the economy.--N. Gregory Mankiw. Behavioral Law and Economics - Eyal Zamir 2018-06-05

In the past few decades, economic analysis of law has been challenged by a growing body of experimental and empirical studies that attest to prevalent and systematic deviations from the assumptions of economic rationality. While the findings on bounded rationality and heuristics and biases were initially perceived as antithetical to standard economic and legal-economic analysis, over time they

have been largely integrated into mainstream economic analysis, including economic analysis of law. Moreover, the impact of behavioral insights has long since transcended purely economic analysis of law: in recent years, the behavioral movement has become one of the most influential developments in legal scholarship in general. Behavioral Law and Economics offers a state-of-the-art overview of the field. Eyal Zamir and Doron Teichman survey the entire body of psychological research that lies at the basis of behavioral analysis of law, and critically evaluate the core methodological questions of this area of research. Following this, the book discusses the fundamental normative questions stemming from the psychological findings on bounded rationality, and explores their implications for setting the law's goals and designing the means to attain them. The book then provides a systematic and critical examination of the contributions of behavioral studies to all major fields of law including: property, contracts, consumer protection, torts, corporate, securities regulation, antitrust, administrative, constitutional, international, criminal, and evidence law, as well as to the behavior of key players in the legal arena: litigants and judicial decision-makers.

The Inferno - Dante Alighieri 2001

Dante's epic narrative poem of a man's journey through hell, purgatory and heaven.

Analysis of Investments and Management of Portfolios - Frank K. Reilly 2012

Faculty Description: Used extensively by professionals, organizations, and schools across the country, ANALYSIS OF INVESTMENTS AND MANAGEMENT OF PORTFOLIOS, 10E, International Edition combines solid theory with practical application in order to help students learn how to manage their money so that they can maximize their earning potential. Filled with real-world illustrations and hands-on applications, this text takes a rigorous, empirical approach to teaching students about topics such as investment instruments, capital markets, behavioral finance, hedge funds, and international investing. It also emphasizes how investment practice and theory are influenced by globalization. In addition, this tenth edition includes new coverage of relevant topics such as the impact of the 2008 financial market crisis, changes in rating agencies and government agencies such as Fannie Mae and Freddie Mac, global assets risk-adjusted performance and intercorrelations, and more. Students can also take advantage of the Thomson ONE Business School Edition, an online, one-stop shop to do financial analysis and research.

Macroeconomics: Canadian Edition - N. Gregory Mankiw 2014-05-09

This special edition of Greg Mankiw's intermediate macroeconomics textbook takes the same approach that made the parent text a bestseller, but with coverage shaped to address fiscal policy, monetary/exchange-rate policy, deficit reduction, and other critical economic issues from the uniquely Canadian perspective. Like Mankiw's Macroeconomics, the Canadian edition teaches fundamentals by relating theoretical concepts to big issues and policy debates, but illustrates those ideas and discussions with examples and cases from Canada, as well as research by Canadian economists.

Macroeconomics - N. Gregory Mankiw 1996-10-01

Murder at the Margin - Marshall Jevons 2014-09-22

Cinnamon Bay Plantation was the ideal Caribbean island getaway—or so it seemed. But for distinguished Harvard economist Henry Spearman it offered diversion of a decidedly different sort and one he'd hardly anticipated: murder. While the island police force is mired in an investigation that leads everywhere and nowhere, the diminutive, balding Spearman, who likes nothing better than to train his curiosity on human behavior, conducts an investigation of his own, one governed by rather different laws—those of economics. Theorizing and hypothesizing, Spearman sets himself on the killer's trail as it twists from the postcard-perfect beaches and manicured lawns of a resort to the bustling old port of Charlotte Amalie to densely forested hiking trails with perilous drops to a barren offshore cay.

Intermediate Microeconomics - Hal R. Varian 2011

A Comparative Analysis of Policing Consumer Contracts in China and the EU - Jiangqiu Ge 2019-02-07

This book seeks to fill a gap in the existing literature by describing the formulation, interpretation and enforcement of the rules on consumer contracts in China and the EU, and by mapping key similarities and differences. The study addresses selected issues regarding consumer contracts: sources of law in the two jurisdictions are first discussed to set the scene. Afterwards, one preliminary issue - how to define the concept of a consumer contract - and two substantive topics - unfair terms and withdrawal rights - are dealt with. Apart from the descriptive analysis, the book also provides possible explanations for these comparative findings, and argues that the differences in consumer contract rules can be primarily attributed to a disparity of markets. The book offers a valuable resource, particularly for researchers and practitioners in the fields of private law and comparative law.

New Ideas from Dead Economists - Todd G. Buchholz 1990

The Shaping of Western Civilization - Michael Burger 2013-01-01

Michael Burger's goal in this inexpensive overview is to provide a brief, historical narrative of Western civilization. Not only does its length and price separate this text from the competition, but its no-frills, uncluttered format and well-written, one-authored approach make it a valuable asset for every history student. The Shaping of Western Civilization begins with the ancient Near East and ends with globalization. Unlike other textbooks that pile on dates and facts, Shaping is a more coherent and interpretive presentation. Burger's skills as writer and synthesizer will enable students to obtain the background required to ask meaningful questions of primary sources. In addition to suggestions for

further reading, this overview includes over 50 images and 22 maps.

Investment Analysis and Portfolio Management - Frank K. Reilly 2006

The purpose of this text is to help the student learn how to manage their money to derive the maximum benefit from what they earn. Mixing investment instruments and capital markets with the theoretical detail on evaluating investments and opportunities to satisfy risk-return objectives along with how investment practice and theory is influenced by globalization. The material is intended to be rigorous and empirical yet not overly quantitative. Reilly/Brown provides the best foundation, used extensively by professionals, organizations, and schools across the country. A great source for those with both a theoretical and practical need for investment expertise.

Economics for Lawyers - Richard A. Ippolito 2012-01-12

Whether dealing with contracts, tort actions, or government regulations, lawyers are more likely to be successful if they are conversant in economics. *Economics for Lawyers* provides the essential tools to understand the economic basis of law. Through rigorous analysis illustrated with simple graphs and a wide range of legal examples, Richard Ippolito focuses on a few key concepts and shows how they play out in numerous applications. There are everyday problems: What is the social cost of legislation enforcing below-market prices, minimum wages, milk regulation, and noncompetitive pricing? Why are matinee movies cheaper than nighttime showings? And then there are broader questions: What is the patent system's role in the market for intellectual property rights? How does one think about externalities like airport noise? Is the free market, a regulated solution, or tort law the best way to deliver the "efficient amount of harm" in the workplace? What is the best approach to the question of economic compensation due to a person falsely imprisoned? Along the way, readers learn what economists mean when they talk about sorting, signaling, reputational assets, lemons markets, moral hazard, and adverse selection. They will learn a new vocabulary and a whole new way of thinking about the world they live in, and will be more productive in their professions.
