Linking Reading Assessment to Instruction - Arleen Shearer Mariotti 2005-05-06

This worktext applies current theory to classroom practice by providing, in each chapter, a brief explanation of major concepts followed by guided practical experience in administering, scoring, and interpreting reading assessment techniques. Like the popular previous editions, the Fourth Edition: *emphasizes the use of assessment and diagnosis for instructional decision making--rather than for simply giving grades; *stresses the use of informal assessment techniques--reflecting the current emphasis in educational assessment theories--but also includes coverage of standardized test scores; *provides both classroom-tested results and interpretations of the data, giving students step-by-step experience in administering, scoring, and interpreting assessment techniques; and *includes numerous "hands-on"

activities. For children to be good readers, they must be taught phonemic awareness, phonics skills, how to read fluently, and how to apply comprehension strategies. *Linking Reading Assessment to Instruction: An Application Worktext for Elementary Classroom Teachers, Fourth Edition*, covers all four areas. This text is designed for undergraduate or graduate reading methods courses that include a diagnosis component, reading diagnosis courses, exceptional education courses, and inservice courses on reading/literacy development. Changes in the Fourth Edition: *discussion of the text's relationship to the areas of reading proposed by the National Reading Panel Report: phonemic awareness, phonics, fluency, vocabulary, and comprehension; *updated "Suggested Readings" for all chapters; *additional references to diagnostic assessments for word-analysis skills and spelling stages; *additional grouping scenarios; *new section on determining a diagnostic path, with instructional suggestions; *relevant ESOL information added in several places; and *revised Instructor's Manual includes more activities.

Closing the Circle - Sean A. Walmsley 2008-03-07

In *Closing the Circle*, Sean Walmsley offers education practitioners at all levels—district and school administrators, curriculum supervisors, staff developers, literacy coaches, classroom teachers, and special education teachers—a coherent framework along with practical advice for setting K–12 language arts expectations and for effectively guiding instruction, assessment, reporting, and data analysis. Distilled from the author’s extensive experience working with schools and districts, the framework enables educators to prioritize literacy learning and work together more productively to achieve better literacy outcomes for all students. The innovative framework includes five major elements: (1) a set of clearly defined literacy attributes (concise expectations for what students should know, do, understand, and experience in the language arts); (2) instructional contributions that best support students, including struggling learners, in acquiring the attributes; (3) appropriate assessments for tracking students’ progress; (4) reporting practices that clearly explain the progress achieved; and (5) rigorous analysis of data to inform instruction. The model embraces a broad conception of literacy and includes expectations for reading, writing, listening, and speaking as well as viewing and representing, making it especially suitable for learning in the digital era.
