Meat Is for Pussies - John Joseph 2014-07-08

John Joseph wants men to know, in no uncertain terms, that they don't need to eat steak, burgers, wings, ribs, or any other animal product, for that matter, to be strong—in fact, he would argue, eating animals is for the weak. Because when your protein sources come from animals, you're missing out on all of the nutritional benefits of a plant-based diet—a diet that can make you more fit, more sexy, and more manly. In *Meat is for Pussies*, Joseph presents a throw-down of information, offering both personal and scientific evidence that a plant-based diet offers the best path to athleticism, endurance, strength, and overall health. In addition to handily dispelling the myths surrounding meat, Joseph offers workout advice, a meal plan, and recipes that make going plant-based easy. Flavor and vitamin-packed options like the Working Man Stew and Veggie Chili with Cornbread will keep men's (and women's) bodies healthy and energized, while workouts that emphasize cardio and strength training build endurance and stamina and prove that you don't need meat to build muscle. Joseph also offers living proof that living a plant-based lifestyle is badass, from super-athlete Brendan Brazier to MMA champion Jake Shields to Joseph himself, who is an Ironman Triathlete and still rocking out (at the age of fifty-two) on world tours as the frontman for his legendary band the Cro-Mags. Joseph's passion for educating the world about the benefits of a plant-based diet comes through on each page, in a voice and a vocabulary that is uniquely his own. At the end of the day, he wants readers to live a long, healthy, happy life . . . and he won't take no for an answer.

Shaman of Oberstdorf - Wolfgang Behringer 1998

Shaman of Oberstdorf tells the fascinating story of a sixteenth-century mountain village caught in a panic of its own making. Four hundred years ago the Bavarian alpine town of Oberstdorf, surrounded by the towering peaks of the Vorarlberg, was awash in legends and rumors of prophets and healers, of spirits and specters, of witches and soothsayers. The book focuses on the life of a horse wrangler named Chonrad Stoeckhlin [1549-1587], whose extraordinary visions of the afterlife and enthusiastic practice of the occult eventually led to his death--and to the death of a number of village women--for crimes of witchcraft. In addition to recounting Stoeckhlin's tale, this book examines the larger world of alpine myths concerning ghosts and other spirits of the night, documenting how these myths have been abused by German political movements over the years. As an introduction to modern German witchcraft research, as a study of the local impact of the Counter Reformation, and as a historical investigation into popular culture, Behringer's book has the advantage of telling a compelling individual story amidst larger discussions of peasant raptures, magical healing, and unfamiliar alpine notions such as the "furious

army," the "wild hunt," popular bonfire festivals, and eerie echoes of pagan Wotan. Wolfgang Behringer is one of the premier historians of German witchcraft, not only because of his mastery of the subject at the regional level, but because he also writes movingly, forcefully, and with an eye for the telling anecdote. Reminiscent of such classics as *The Cheese and the Worms* and *The Return of Martin Guerre*, *Shaman of Oberstdorf* is an unforgettable look at early modern German folklore and culture.

Positive Lightning - Laurie Salzler 2014-12-15

Kate Winter teaches dog owners how to train their canine companions. During her spare time, accompanied by her Lab, Dakota, she explores the woods and beaches on foot or horseback. She's worried that something's happening in her relationship, but she can't get her girlfriend Trish to talk to her about it. Faith Hutchins recently lost her sight after a terrible outdoor accident. She's dealt with her anger, depression, and blindness primarily on her own. A seeing-eye dog would help alleviate her reliance on anyone else, but the guide dog school has been unsuccessful in providing her with one. On a mission to find someone who will train a dog specifically for her, she ultimately zeroes in on Kate. They say lightning never strikes the same place twice. But positive lightning is notoriously unpredictable and can ignite a fire when and where least expected . . . no matter who's in its path."

The Wisdom of the Desert - Thomas Merton 1970-01-17

The *Wisdom of the Desert* was one of Thomas Merton's favorites among his own books—surely because he had hoped to spend his last years as a hermit. The personal tones of the translations, the blend of reverence and humor so characteristic of him, show how deeply Merton identified with the legendary authors of these sayings and parables, the fourth-century Christian Fathers who sought solitude and contemplation in the deserts of the Near East. The hermits of Scete who turned their backs on a corrupt society remarkably like our own had much in common with the Zen masters of China and Japan, and Father Merton made his selection from them with an eye to the kind of impact produced by the Zen mondo.

Combating Trafficking in Persons - 2009

Trafficking in persons is a form of modern-day slavery, a human rights violation that constitutes a crime against the individual and the State. It must be recognized and punished by legislative means. Parliamentarians have an essential role to play in the fight against human trafficking. The Handbook for Parliamentarians suggests some practical ways in which they can develop and promote the comprehensive frameworks needed to do so.

Community Rehabilitation in Neurology - Michael P. Barnes 2003-09-04

Rehabilitation should not stop when the disabled person is discharged from hospital, and many neurological patients require ongoing rehabilitation in order to maximize their functional abilities, minimize complications and promote full participation at home and in the community. This book analyses community rehabilitation needs from many different perspectives, including the views of disabled people, rehabilitation clinicians and service providers. Many examples of community rehabilitation schemes are presented, with evidence for their effectiveness, and case studies are used to highlight the main issues. The authors take an international view, and there are chapters dealing with the disabled child in the community and with neuropsychological rehabilitation. This important book examines the growing trend towards community rehabilitation in neurology and is directed towards all clinicians involved with neurorehabilitation.

Permissions, A Survival Guide - Susan M. Bielstein 2010-06-15

If a picture is worth a thousand words, then it's a good bet that at least half of those words relate to the picture's copyright status. Art historians, artists, and anyone who wants to use the images of others will find themselves awash in byzantine legal terms, constantly evolving copyright law, varying interpretations by museums and estates, and despair over the complexity of the whole situation. Here, on a white—not a high—horse, Susan Bielstein offers her decades of experience as an editor working with illustrated books. In doing so, she unsnarls the threads of permissions that have ensnared scholars, critics, and artists for years. Organized as a series of “takes” that range from short sidebars to extended discussions, *Permissions, A Survival Guide* explores intellectual property law as it pertains to visual imagery. How can you determine whether an artwork is copyrighted? How do you procure a high-quality reproduction of an image? What does “fair use” really mean? Is it ever legitimate to use the work of an artist without permission? Bielstein discusses the many uncertainties that plague writers who work with images in this highly visual age, and she does so based on her years navigating precisely these issues. As an editor who has hired a photographer to shoot an incredibly obscure work in the Italian mountains (a plan that backfired hilariously), who has tried to reason with artists' estates in languages she doesn't speak, and who has spent her time in the archival trenches, she offers a snappy and humane guide to this difficult terrain. Filled with anecdotes, asides, and real courage, *Permissions, A Survival Guide* is a

unique handbook that anyone working in the visual arts will find invaluable, if not indispensable.
The Golden Butterfly - Sir Walter Besant 1890

Of Gods and Monsters - John T. Soister 2015-09-18

While Universal's *Dracula* and *Frankenstein* (both 1931) have received the most coverage of any of the studio's genre releases, it is the lesser known films that have long fascinated fans and historians alike. Starting with *The Last Warning*, a 1929 movie released as both a silent and a talkie, Universal provided a decade of films that entertained audiences and sometimes frustrated critics. Each of Universal's horror, science fiction and "twisted mystery" films receives an in-depth essay for each film. The focus is first on the background to the making of the movie and its place in the Universal catalog. A detailed plot synopsis with critical commentary follows. Filmographic data for the film conclude the entry. Universal's *The Shadow* short film series is covered in an appendix. Many rare illustrations and movie posters are also included.

His classic work, *Introduction to the Spiritual Life*—first published in English in 1961 and now brought back into print—provides readers with an inspiring and comprehensive vision of Christian spirituality that is unmatched in its warmth, lucidity, and accessibility. *Introduction to the Spiritual Life* is, by author Louis Bouyer's own description, a manual for practical use. Much more than just a work of "spirituality" or "apologetics," it is a hybrid of both, produced with an expertise and confidence borne of a lifetime of prayer and study. It aims to cultivate interior growth through a thoughtful, reasoned meditation on the spiritual meaning of the Gospel as proclaimed by the Catholic Church. Catholics who read *Introduction to the Spiritual Life* will better appreciate how a life of prayer can be shaped and enriched by sound Christian doctrine.

Europe 1450 to 1789 - Jonathan Dewald 2004

Communal Reformation - Peter Blickle 1992

Communal Reformation is the most original and provocative book to appear in its field in the past quarter-century. It met with an enthusiastic response, particularly in England and the United States, when first published in Germany in 1985 and is now available in translation. Peter Blickle's groundbreaking study, which is intended for scholars and students interested in the history of pre-modern Europe, the development of Germany, the history of Christianity, and historical sociology, reconstructs the connection between the crisis of rural society at the end of the Middle Ages, the great Peasants' War of 1525, and the reformation as a social movement. Blickle focuses on southern Germany, Switzerland, and Austria in the later Middle Ages and Early Modern eras (roughly 1400 to 1600), though his work has important implications for the social and religious history of Europe as a whole.

Molecular and Nano Electronics: Analysis, Design and Simulation - Jorge M. Seminario 2006-10-24

The aim of Molecular and Nano Electronics: Analysis, Design and Simulation is to draw together contributions from some of the most active researchers in this new field in order to illustrate a theory guided-approach to the design of molecular and nano-electronics. The field of molecular and nano-electronics has driven solutions for a post microelectronics era, where microelectronics dominate through the use of silicon as the preferred material and photo-lithography as the fabrication technique to build binary devices (transistors). The construction of such devices yields gates that are able to perform Boolean operations and can be combined with computational systems, capable of storing, processing, and transmitting digital signals encoded as electron currents and charges. Since the invention of the integrated circuits, microelectronics has reached increasing performances by decreasing strategically the size of its devices and systems, an approach known as scaling-down, which simultaneously allow the devices to operate at higher speeds. * Provides a theory-guided approach to the design of molecular and nano-electronics * Includes solutions for researchers working in this area * Contributions from some of the most active researchers in the field of nano-electronics

Madness, Religion and the State in Early Modern Europe - David Lederer 2006-05-04

From the ideological crucible of the Reformation emerged an embittered contest for the human soul. In the care of souls, the clergy zealously dispensed spiritual physic; for countless early modern Europeans, the first echelon of mental health care. During its heyday, spiritual physic touched the lives of thousands, from penitents and pilgrims to demoniacs and mad people. Ironically, the phenomenon remains largely unexplored. Why? Through case histories from among the records of over 1,000 troubled and desperate individuals, this regional study of Bavaria investigates spiritual physic as a popular ritual practice during a tumultuous era of religious strife, material crises, moral repression and witch hunting. By the mid-seventeenth century, secular forces ushered in a psychological revolution across Europe. However, spiritual physic ensconced itself by proxy upon emergent bourgeois psychiatry. Today, its remnants raise haunting questions about science and the pursuit of objective knowledge in the ephemeral realm of human consciousness.

The Revolution of 1525 - Peter Blicke 1981

"A major book that scholars will want to study closely, both for its provocative treatment of the interaction of economic and social pressures with politics and ideology and for its many revisions of Marxist and non-Marxist interpretations... [Blicke's] book will influence scholarship for some time to come."-- Journal of Modern History.
