Framed Ink 2 - Marcos Mateu-Mestre 2020-12-18

The highly anticipated follow-up to Framed Ink from Marcos Mateu-Mestre, Framed Ink 2 provides insight into another compositional tool that Marcos uses every day to create his amazing artwork--the energy within the working frame. In each piece of art, regardless of its format, one must consider essential factors such as the push-pull, tension-relaxation, pressure-release, balance and imbalance that happen inside the working area to support our storytelling. All of these factors apply in any aspect ratio, whether it be horizontal, vertical or square, each a format to consider when working in the movie, gaming, animation and graphic novel industries, which in our day and age can be presented through a variety of outlets such as a movie theater, home theater, social media and a number of personal devices. Marcos encourages and educates us on how not to be limited by the format but to embrace and rise to the challenge of designing for each format. A perfect accompaniment to his prior releases Framed Ink, Framed Perspective Vol. 1 and Vol. 2 and Framed Drawing Techniques, this book will take a reader's knowledge base to the next level and allow them to build on their expertise as an effective visual storyteller.

Brazil - Errol Lincoln Uys 2000

Brazil is the first work of fiction to depict five centuries of a great nation's remarkable history, its evolution from colony to kingdom, from empire to modern republic. With a stunning cast of real and fictional characters, the story unfolds in South America, Africa and Europe. Two families dominate this extraordinary novel. The Cavalcantis are among the original settlers and establish the classic Brazilian plantation -- vast, powerful, built with slave labor. The da Silvas represent the second element in both contemporary and historical Brazil: pathfinders and prospectors. For generations, these adventurers have their eyes set on El Dorado, which they ultimately find -- in a coffee fazenda at Sao Paulo. Brazil is an intensely human story -- brutal and violent, tender and passionate. Perilous explorations through the Brazilian wilderness...the perpetual clash of pioneer and native, visionary and fortune hunter, master and slave, zealot and exploiter...the thunder of war on land and sea as European powers and South American nations pursue their territorial conquests...the triumphs and tragedies of a people who built a nation covering half the South American continent...all are here in one spell-binding saga.

That Winter - Pamela Gillilan 1986

Pamela Gillilan was born in London in 1918, married in 1948 and moved to Cornwall in 1951. When she sat down to write her poem *Come Away* after the death of her husband David, she had written no poems for a quarter of a century. Then came a sequence of incredibly moving elegies. Other poems followed, and two years after starting to write again, she won the Cheltenham Festival poetry competition. Her first collection *That Winter* (Bloodaxe, 1986) was shortlisted for the Commonwealth Poetry Prize.

Marine Auxiliary Machinery - H. D. McGeorge 2013-10-22

Marine Auxiliary Machinery, Seventh Edition is a 16-chapter text that covers the significant advances in marine auxiliary machinery relevant to the certification of competency examinations. The introductory chapters deal with the basic components of marine machineries, such as propulsion system, heat exchanger, valves, and pipelines. The succeeding chapters describe the pumps and pumping system, specifically the tanker and gas carrier cargo pumps. Considerable chapters are devoted to the operation of machinery's major components, including the propeller shaft, steering gear, auxiliary power, bow thrusters, and stabilizers. Other chapters consider the refrigeration, heating, ventilation, and air conditioning systems. The final chapters tackle the safety system of marine auxiliary machinery,

particularly the fire protection, safety, instrumentation, and control systems. This book will prove useful to marine and mechanical engineers.

Marine Terminal Survey Guidelines - Oil Companies International Marine Forum 1995-01-01

Ship Operations and Management - 2011

Aimed at ship owners, operators and managers, this text covers a range of topics including registration, insurance costs, cargoes, crewing, bunkering, voyage estimation and legal issues. This text will also be of interest to those studying for the TutorShip exams as part of the ICS qualification.

Shipboard Operations, Second Edition - H I Lavery 2013-10-11

This book covers the knowledge of shipboard operations required by candidates for professional qualification as Chief Officer and Master Mariner. It deals with the basic routines and procedures, and the many regulations governing their use, for the safe and efficient operation of merchant ships. The book is also designated a fundamental text for the Maritime Transport paper of the Chartered Institute of Transport's membership examinations. The second edition takes into account recent developments in technology and regulation, and in particular covers major international legislation on Safety of Life at Sea and on Maritime Pollution as well as recent UK regulations on occupational health and safety and on operation of ro-ro ferries.

Community Impact Assessment - 1996

This guide was written as a quick primer for transportation professionals and analysts who assess the impacts of proposed transportation actions on communities. It outlines the community impact assessment process, highlights critical areas that must be examined, identifies basic tools and information sources, and stimulates the thought-process related to individual projects. In the past, the consequences of transportation investments on communities have often been ignored or introduced near the end of a planning process, reducing them to reactive considerations at best. The goals of this primer are to increase awareness of the effects of transportation actions on the human environment and emphasize that community impacts deserve serious attention in project planning and development-attention comparable to that given the natural environment. Finally, this guide is intended to provide some tips for facilitating public involvement in the decision making process.

Doing Business in 2005 - 2005

Doing Business in 2005: Obstacles to Growth is the second in a series of annual reports investigating the scope and manner of regulations that enhance business activity and those that constrain it. New quantitative indicators on business regulations and their enforcement can be compared across more than 130 countries, and over time. The indicators are used to analyze economic outcomes and identify what reforms have worked, where and why. Topics in Doing Business in 2005 include: Licensing and Inspections: Having registered a business, now what? In most countries, firms face a myriad of sector specific licenses as well as inspections to enforce compliance. The Doing Business database constructs two sets of indicators on the regulation of operations. One measures the steps, time and costs of complying with licensing and permit requirements for ongoing. The other assesses the enforcement of regulations through two of the most common types of inspections-labor and tax. Registering Property: Property registries were first developed to help raise tax revenue. What was good for the tax authorities has since proven to be good for strengthening property rights-the registries strengthen incentives to invest, facilitate trade, and expand access to credit. New indicators cover the steps, time and cost to register property. Measures of the legal provisions that strengthen property rights and the efficiency of property registries are also developed. Protecting Investors: Corporate governance issues are often thought to affect only publicly listed companies in developed countries. In fact, corporate governance is relevant for every large privately held company that has more than one owner. New indicators examine several possible types of shareholder expropriation, including related-party transactions, guarantees and loans to company managers and directors, mergers and acquisitions, disclosure of ownership information, and treatment of conflicts of interest. Including a new emphasis on gender, Doing Business not only provides insights into business constraints throughout the world but highlights particular barriers faced by women. Doing Business is a comprehensive resource that no investor, economic adviser, business developer, or economic policymaker should be without.

Reed's Mathematical Tables and Engineering Formulae - N/A 2002-12-06

The subjects treated in this book are those commonly required in mechanical and marine engineering, including naval architecture. The formulae are graduated to cover the subjects at all stages from technician level to degree, from cadet level to Extra First Class Certificate. Inevitably some specialised or

favourite formulae will have been omitted, so after each subject a few blank pages have been provided to allow extra formulae and design data to be recorded.

Marine Control Technology - J. Majumder 2007-11-21

The shipping industry has been growing in leaps and bounds over the past few decades. The answer to reduced manning, together with demanding operating schedules, has more often than not been automation. Hence the need of the hour for a seafarer is adequate knowledge of UMS environments and their supporting systems onboard ships. With almost 30 years of first-hand experience by each of us in this mammoth industry, we have seen the evolution from control elements and systems of the post 2nd world- war era to the most sophisticated components and networks available today. It has indeed been a wonderful journey through time! These experiences have been our guiding light; they have prompted us to share our acquired knowledge with our counterparts and students of the maritime industry.

Doing Business 2009 - World Bank 2008-09-10

The Doing Business series provides research, data, and analysis on regulation in 181 economies across 10 areas of the business life cycle. Doing Business 2009 identifies top reformers in business regulation and highlights best practices and global reform trends. This year's report builds upon the five previous editions, adding new economies and updating all indicators. This year's report covers 3 additional economies, bringing the total number of economies covered to 181. Now included are the Bahamas, Bahrain, and Qatar. The report also adds a preface on Doing Business methodology, as well as in-depth analysis throughout the report on the main trends and findings of the past six years of Doing Business.

Doing Business is an invaluable resource for entrepreneurs, investors, advisors, academics, professionals, and policymakers. The indicators benchmark regulation across 10 areas of a typical business lifecycle, and are used to analyze economic and social outcomes that matter such as equal opportunity, unemployment, poverty, and growth. This annually-published report gives policymakers the ability to measure regulatory performance in comparison to other economies, and learn from best practices.

Small States, Smart Solutions - Edgardo Favaro 2008

Small states face special hurdles in achieving development gains. These states spend significantly more of their GDP on producing public goods and services, and they face higher connectivity costs than do their larger brethren. Small States, Smart Solutions examines how some small states use international trade and telecommunications technology to outsource services such as justice, banking supervision, public utilities regulation, high-quality medicine, and education. Sourcing these services internationally poses unique challenges but also opens broad opportunities. The eight case studies in this book, based on interviews with government officers and citizens, describe pioneering initiatives undertaken by some small states to better the quality of life of their citizens.

Reeds Marine Distance Tables 16th Edition - Miranda Delmar-Morgan 2020-03-03

Reeds Marine Distance Tables give quick and accurate distance references between 500 regularly used ports around the world, including major turning points and a Transatlantic distance table. The book is divided into key "market areas," and includes a pull-out map for area identification and easy see-at-a-glance port reference. Traffic Separation Schemes are calculated into the tables while the distance to any port not included can easily be determined by making an approximation from the next closest port. Useful tables of major "turning points" around the world (such as Cape Finisterre, Cape Horn and the Dover Straits), Transatlantic distances, world time zones, and time and speed conversion tables are also included. This edition has been improved and expanded. Emerging ports around the world have also been added to reflect modern trends and developments in shipping movements and expansions. Reeds Marine Distance Tables are an invaluable reference for ship owners, operators, brokers, navigators, and superyacht skippers wanting a quick and accurate distance reference between all the regularly used commercial ports around the world.. Using this one reference, anyone can calculate the shortest or most economical distances between all the major ports in the world. "A first class reference" - Nautical Magazine "Clear and simple support for anyone wanting to calculate the shortest or most economical distance between major ports" - Telegraph

Reeds Vol 16: Electrical Power Systems for Marine Engineers - Gordon Boyd 2020-10-01

Within the marine and offshore industry, there is a clear and growing need for increased training and education on the use of electrical power systems. The number of electrical plant and appliances now in service has grown at an alarming rate in recent years, as has the amount of electrical power generated and utilised on board. Large passenger ships now carry as many electrical officers as marine engineers, and electrical propulsion is now in common use by LNG carriers, small parcel tankers, oil tankers, ferries, offshore support, the navy, fleet auxiliary, cable layers and cruise ships. A number of shipping companies now award the Chief Electro Technical Officer the equivalent rank to the ship's master and Chief Engineer. These developments have resulted in the establishment of a Foundation Degree programme for Electro Technical Officers and the current development of full degree programmes. As such, a targeted textbook for students on the subject is required. As with all titles in the Reeds Marine Engineering Series, this book will be written in clear, accessible language, so as to be of use to all students and particularly those for whom English isn't their first language. Technical drawings and diagrams will be used throughout

and each chapter will be accompanied by example examination questions.

This is required in accordance with regulation 17 of the International Convention for the Prevention of Pollution from Ships, 1973, as modified by the Protocol of 1978 (MARPOL73/78)

International Code on Intact Stability, 2008 - International Maritime Organization 2009

The International Code on Intact Stability 2008 (2008 IS Code), presents mandatory and recommendatory stability criteria and other measures for ensuring the safe operation of ships, to minimize the risk to such ships, to the personnel on board and to the environment. The 2008 IS Code took effect on 1 July 2010.

The 2008 IS Code features: a full update of the previous IS Code; criteria based on the best state-of-the-art concepts available at the time they were developed, taking into account sound design and engineering principles and experience gained from operating ships; influences on intact stability such as the dead ship condition, wind on ships with large windage area, rolling characteristics and severe seas. This publication also presents Explanatory Notes to the 2008 IS Code, intended to provide administrations and the shipping industry with specific guidance to assist in the uniform interpretation and application of the intact stability requirements of the 2008 IS Code.

How to Avoid a Climate Disaster - Bill Gates 2021-02-16

#1 NEW YORK TIMES BEST SELLER • In this urgent, authoritative book, Bill Gates sets out a wide-ranging, practical—and accessible—plan for how the world can get to zero greenhouse gas emissions in time to avoid a climate catastrophe. Bill Gates has spent a decade investigating the causes and effects of climate change. With the help of experts in the fields of physics, chemistry, biology, engineering, political science, and finance, he has focused on what must be done in order to stop the planet's slide to certain environmental disaster. In this book, he not only explains why we need to work toward net-zero emissions of greenhouse gases, but also details what we need to do to achieve this profoundly important goal. He gives us a clear-eyed description of the challenges we face. Drawing on his understanding of innovation and what it takes to get new ideas into the market, he describes the areas in which technology is already helping to reduce emissions, where and how the current technology can be made to function more effectively, where breakthrough technologies are needed, and who is working on these essential innovations. Finally, he lays out a concrete, practical plan for achieving the goal of zero emissions—suggesting not only policies that governments should adopt, but what we as individuals can do to keep our government, our employers, and ourselves accountable in this crucial enterprise. As Bill Gates makes clear, achieving zero emissions will not be simple or easy to do, but if we follow the plan he sets out here, it is a goal firmly within our reach.

Forensis - Lawrence Abu Hamdan 2014

The role of material forensics in articulating new notions of the public truth of political struggle, violent conflict, and climate change are the focus of *Forensis*, the HKW exhibition catalog based on the theories of Eyal Weizman. - The concept of forensis was developed as a research project by Goldsmiths College, Centre for Research Architecture by theorist Eyal Weizman. The project is the subject of a major exhibition at the Haus der Kulturen der Welt (HKW) and catalog cum theoretical reader presenting the findings and contributions of over 20 influential architects, artists, filmmakers, and academics. *Forensis*, (Latin for pertaining to the forum) argues for the role of material forensics as central to the interpretation of the ways in which states police and govern their subjects. Forensics engages struggles for justice across frontiers of contemporary conflict through the study of how technology mediates the testimony of material objects such as bones, ruins, toxic substances, etc. In the hopes of unlocking forensics potential as a political practice, the project participants present innovative investigations aimed at producing new kinds of evidence for use by international prosecutorial teams, political organizations, NGOs, and the UN.

[The Last Platoon](#) - Bing West 2020-12-15

As seen on CBS This Morning Saturday! “Bing West is the grunt’s Homer.” –L.A. Times A platoon of Marines and CIA operatives clash in a fight to the death with the drug lords and the Taliban, while in Washington, the president seeks a way out. A small team of CIA operatives and Marines commanded by Captain Diego Cruz are protecting a tiny base in Helmand—the most violent province in Afghanistan. In a series of escalating fights, Cruz must prove he is a combat leader, despite the growing disapproval of the colonel in overall charge. At the same time, the president has ordered the CIA to capture a drug lord. But with a fortune in heroin at stake, the Taliban joins with the drug lord to wipe out the base. As the president negotiates a secret deal, Cruz must rally the Marines to make a last stand. Bringing you into America’s longest war with vivid immediacy, *The Last Platoon* portrays how leaders rise or wilt under intense pressure. A searing, timeless story of moral conflict, savage combat, and feckless politics.

Doing Business in 2006 - World Bank 2006

This publication is the third in a series of annual reports giving a comparative analysis of business regulations and their enforcement across 155 countries and over time. Comparable data indicators are given for 10 topics: starting a business, dealing with licences, hiring and firing workers, registering property, getting credit, investment protection, paying taxes, trading across borders, enforcing contracts, and closing a business. These indicators are used to assess socio-economic outcomes including levels of unemployment and poverty, productivity, investment and corruption; and to identify which regulatory measures enhance business activity and those that work to constrain it. This is a co-publication of the World Bank and the International Finance Corporation.

The Portuguese of Trinidad and Tobago - Jo-Anne S. Ferreira 2018

Traditionally a navigating and migratory people, Portuguese settlers came to the Caribbean as early as the seventeenth century. The ancestors of the modern Portuguese community in Trinidad and Tobago hailed from the archipelago of Madeira, fleeing their homeland in search of an economic and religious haven from the 1830s onwards. They came neither to explore nor to conquer, had no history of land and slave ownership in the Caribbean, and they came without prestigious family names or old money. Yet within a few generations, struggles were overcome to push the community to the forefront of national life, in the areas of business, politics, religion and culture. Bound by language and traditions, the Portuguese were able to work together for their common good, the result of which was a proliferation of Portuguese businesses of various sizes and descriptions all over the country. Though few in number, the Portuguese contribution to their adopted homeland is of a significance beyond the small size of the community. Every migrating group has a tale to tell. For years, the tale of the Madeirans in Trinidad and Tobago and Luso-Trinidadians and Tobagonians has gone untold. Here is an attempt to tell their story in the context of culture and entrepreneurship. --
