Teaching English in Africa is a practical guide written for primary and secondary school teachers working all over the continent. This book relates the practice of English language teaching directly to the African context. As well as covering the underlying theory of how children learn languages and how teachers can best facilitate this learning, it also provides practical resources and ideas for activities and techniques that have proved successful in English classrooms in Africa, both at primary and secondary level. It is intended to be a practical guide, so references and citations are kept to a minimum and concepts are presented using examples that are likely to be familiar to most teachers working in Africa. If there is a bias in this book, it is towards the needs of teachers working in low-resource, isolated contexts in Africa, as these teachers are so often neglected by literature on teaching methodology.

**The Power of Teacher Networks** - Ellen Meyers 2009-03-31

This is a simple, effective idea that should have been thought of sooner. Kung Fu Phonics

teaches phonics, i.e. the rules of "sounding out" words, through phonetics. Q: How do you say "phone?" A: /fon/ Phonics books out today (chockablock with happy hippos and grinning giraffes) are aimed at kindergartners. 4th-grade kids consider them "baby books." Phonetics texts are all daunting tomes for grad students of comparative linguistics and philology, and buying one will put you out fifty dollars. No book has used the one to teach the other, until KUNG FU PHONICS. Phonetics has only ever been used to describe how words sound. Kung Fu Phonics is the first to employ phonetics PREDICTIVELY, asking students to describe how unfamiliar words SHOULD sound. Kung Fu Phonics is great for teaching K and pre-K kids to read, and with them you can skip the phonetic notations and just have them read and say the words. It's also a fine tool for teaching English to non-native speakers of any age. If your child is reading below grade level, spend twenty minutes a day with him studying phonetics with this book. Phonetics is just a tool, an uncomplicated but exacting series of squiggles. It's a nice bit of misdirection. He'll complain about phonetics and how useless it is while you're doing something awfully concrete to bolster his reading skills: teaching PHONICS. (And since he's learning something his classmates aren't, it doesn't have the embarrassing feel of remediation.) It's an 88-page workbook. Twenty-five lessons, five model words and fifty exercise words per lesson. Concise instructions keep almost every lesson to two pages. And the instructions are so clear that anyone who reads English on a high-school level can use Kung Fu Phonics to teach reading. (Alas, you can't just toss it to a kindergartner and tell her to get busy; it requires cooperative effort.) It requires no DVD or audio CD to use; it's ready to teach as is. This is the American English edition of KUNG FU PHONICS. It uses American (Merriam-Webster) phonetics and describes American pronunciations.

*Language Diversity in the Sinophone World* - Henning Klöter 2020-10-06

*Language Diversity in the Sinophone World* offers interdisciplinary insights into social, cultural, and linguistic aspects of multilingualism in the Sinophone world, highlighting language diversity and opening up the burgeoning field of Sinophone studies to new perspectives from sociolinguistics. The book begins by charting historical trajectories in Sinophone multilingualism, beginning with late imperial China through to the emergence of English in the mid-19th century. The volume uses this foundation as a jumping off point from which to provide an in-depth comparison of modern language planning and policies throughout the Sinophone world, with the final section examining multilingual practices not readily captured by planning frameworks and the ideologies, identities, repertoires, and competences intertwined within these different multilingual configurations. Taken together, the collection makes a unique sociolinguistic-focused intervention into emerging research in Sinophone studies and will be of interest to students and scholars within the discipline.

**Assessing Language Teachers' Professional Skills and Knowledge** - Rosemary Wilson 2015-01-31

"The growth in English language teaching worldwide and the related increase in teacher training programmes of all kinds highlight the need for greater accountability in the assessment of teachers. The need for formal summative assessment has taken on greater importance in training programmes and requires procedures which do not always sit easily with the development process, while transparency of assessment procedures is also increasingly demanded by the candidates themselves. This edited volume discusses key issues in assessing language teachers' professional skills and knowledge and provides case study illustrations of how teacher knowledge and teaching skills are assessed at pre-service and in-service levels within the framework of the Cambridge English Teaching Qualifications. The volume provides: - discussion of ways in which the changing nature of English language teaching has impacted on teacher education and assessment - examples of specific assessment procedures for both teaching knowledge and practical classroom skills - accounts of the ways in which the Cambridge English Teaching Qualifications have been integrated into and adapted for local contexts. This is the first volume of its kind wholly dedicated to language teacher assessment and as such will be of interest to language teachers and teacher educators as well as to researchers and postgraduate students"--

**Empire and Ecology in the Bengal Delta** - Debjani Bhattacharyya 2018-05-24

What happens when a distant colonial power tries to tame an unfamiliar terrain in the world's largest tidal delta? This history of dramatic ecological changes in the Bengal Delta from 1760 to 1920 involves land, water and humans, tracing the stories and struggles that link them together. Pushing beyond narratives of environmental decline, Bhattacharyya argues that 'property-thinking', a governing tool critical in making land and water discrete categories of bureaucratic and legal management, was at the heart of colonial urbanization and the technologies behind the draining of Calcutta. The story of ecological change is narrated alongside emergent practices of land speculation and transformation in colonial law. Bhattacharyya demonstrates how this history continues to shape our built environments with devastating consequences, as shown in the Bay of Bengal's receding coastline.
